Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect staff during the post-census data publication process. The Bureau was guided by then Director, Bruce Chapman, and Deputy Director, C.L. Kincannon. Primary direction of the data publication program was performed by William P. Butz, Associate Director for Demographic Fields, assisted by Peter A. Boupnene, Assistant Director for Demographic Censuses, in conjunction with Barbara A. Baier, Associate Director for Statistical Standards and Methodology, Howard N. Hamilton, Acting Associate Director for Information Technology, James D. Lincoln, then Associate Director for Administration, and Stanley D. Moore, Associate Director for Field Operations. The Director's staff was assisted by Sherry L. Courtland. Direction of the census enumeration and early processing activities was provided by Vincent P. Barabba, former Director; Daniel B. Levine, former Deputy Director; and George E. Hall, former Associate Director.

Responsibility for the overall planning, coordinating, processing, and publication of the 1980 census was in the Decennial Census Division under the direction of Stanley D. Matchett, Chief, assisted by Rachel F. Brown and Roger O. Lepage, Assistant Division Chiefs. The following Branch Chiefs were responsible for support services: Donald R. Dalzell, Stephen E. Goldman, Judith A. McKay, Dennis W. Stoudt, and Richard R. Warren. The systems design and computer programs necessary for this report were prepared by Valerie Gregg, Caroline Magill, George McLeughlin, and William Peil.

Responsibility for the overall planning, coordinating, processing, and publication of the 1980 census Supplementary Questionnaire Program for American Indians was in the Population Division under Nampeo R. McKenney, Assistant Division Chief for Ethnic and Racial Statistics Programs, and Patricia A. Berman, former Chief, Racial Statistics Branch, under the general direction of Roger A. Herriot, Chief, Paula J. Schneider, Program Director, and Meyer Zitter, former Division Chief. Karen A. Crook and Edna L. Paisano, Racial Statistics Branch, had major responsibility for the development and implementation of various phases of the Program. Responsibility for developing the housing portion of the 1980 census supplementary questionnaire content and processing specifications and designing the tabulations was in the Housing Division under the direction of Arthur F. Young, Chief, and under the supervision of William A. Downs,

Chief, Decennial Planning and Data Services Branch, assisted by Imelda M. Hall. Important contributions were made by Sharron S. Baucom and Cynthia M. Taeuber, Population Division, and Carmina F. Young, Housing Division.

This report was planned and its content developed in the Population Division by Karen A. Crook and Gloria J. Porter under the direction of Patricia A. Berman, former Chief, Racial Statistics Branch. Important contributions were made by Edna L. Paisano. Contributions also were made by June H. Cowles and Deborah L. Burgess. The work was under the general direction of Nampeo McKenney, Assistant Division Chief for Ethnic and Racial Statistics Programs. William A. Downs, Chief, Decennial Planning and Data Services Branch, assisted by Imelda M. Hall and Sherry Pollock, in Housing Division were responsible for the material on housing. Important contributions for the material on the indicated fields of specialization were made by the following persons: Education Statistics, Rosalind R. Bruno; Migration Statistics, Celia G. Boertlein and Kristin A. Hansen; Health and Poverty Statistics, John M. McNeil and Thomas Gelinne; Labor Force Statistics, Thomas S. Scopp, Thomas J. Palumbo, John A. Priebe, Paula L. Vines, and Delana F. Kametani; and Income Statistics, George F. Patterson.

A number of American Indian and Alaska Native governments and organizations, Federal agencies, researchers, and advisors contributed to the development of the questionnaire and content of the report.

Administration support was provided by the Administrative Services Division, Robert L. Kirkland, Chief, and William C. Fanning, Assistant Chief.

Computer processing was performed in the Computer Operations Division, C. Thomas DiNenna, Chief, James E. Steed, George M. Bowden, and Joseph J. Sferrelle, Assistant Chiefs.

Questionnaire processing procedures were developed in the Decennial Processing Staff by James S. Werking, then Chief, assisted by Isabelle McCants and Judy Dawson. The clerical coding and conversion of the questionnaires were performed in the Data Preparation Division, Don L. Adams, Chief; Jeffersonville Processing Office, Robert L. Kirkland, then Processing Manager, assisted by Judy Petty, Norris Barringer, Carolyn Rosamen, Leorda Houston, and Laurelle Nelson.

User services were provided by the Data User Services Division under the supervision of Michael G. Garland, Chief, Marshall L. Turner, Jr., and Paul T. Zeisset, Assistant Chiefs.

Data collection activities were supervised in the Field Division by Lawrence T. Love, Chief, under the direction of Richard Blas Charles Hancock, and George T. Reinar, Assistant Chiefs, with the assistance of the directors and assistant directors of the Bureau's regional offices.

Geographic programs and plans were developed in the Geography Division under Robert W. Marx, Division Chief, Donald I. Hirschfeld and Alice Winterfeld, Branch Chiefs.

Publications editing, design, composition, and printing procurement were performed by the staff of the Publications Services Division, Raymond J. Koski, Chief; Milton S. Andersen, Arlene C. Duckett, and Gerald A. Mann, Branch Chiefs.

The Statistical Methods Division was largely responsible for weighting the supplementary questionnaire data, producing estimates of sampling error and quality control of the data coding operations. This work was supervised by Charles D. Jones, Chief, and Susan M. Miskura, former Assistant Division Chief. Important contributions were made by Henry F. Wolman, Thomas W. Harahush, Richard A. Griffin, Michael L. Mersch, Robert G. Edson, Milton C. Fan, and Janet St. Clair.

The system design, technical specifications and assembly were the responsibility of the Technical Services Division, C. Thomas DiNenna, Acting Chief, and Robert J. Varson, Branch Chief.

Many other persons participated in the various activities of the 1980 census. For a list of key personnel, refer to the *History of the 1980 Census of Population and Housing*, (PHC80-R2).

GENERAL

This report is part of the *Subject Reports* series and presents sample data from the 1980 Census Supplementary Questionnaire For American Indians (Reservations and Historic Areas of Oklahoma) for the United States, Census Regions, Standard Federal Administrative Regions, Divisions, selected States, Identified American Indian Reservations, the Identified Historic Areas of Oklahoma (excluding urbanized areas), and Tribal Governments and selected tribes in the Identified Historic Areas of Oklahoma (excluding urbanized areas).

The abbreviated identification for this report series is PC8O-2 (i.e., Population Census, 1980—Volume 2) followed by a number and a letter representing the specific report.

A large portion of the information compiled from the 1980 Census of Population and Housing appears in Volume 1, *Characteristics of the Population, and Characteristics of Housing Units*, which focuses on data for the United States, States, standard metropolitan statistical areas (SMSA's), urbanized areas (UA's), counties, places, American Indian reservations, and other geographic areas. Results from the 1980 census also are provided on computer tape files in the form of summary tape files (STF's). The STF's have been designed to provide statistics with greater subject and/or geographic detail

than is feasible to publish in printed reports. An extensive amount of data on American Indians, Eskimos, and Aleuts are published in the Volume 1 reports and included on the summary tape files. For a description of the 1980 census data products, see Appendix F, "Publication and Computer Tape Program."

Legal provision for the 1980 census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (Amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

The 1980 Census Supplementary Questionnaire For American Indians (Reservations and Historic Areas of Oklahoma) was developed by the Bureau of the Census in conjunction with the Office of Management and Budget Task Force on Indian Census. In view of the unique living conditions present on many reservations and certain parts of Oklahoma, the 1980 Census Supplementary Questionnaire was designed to provide additional information on the American Indian, Eskimo, and Aleut populations beyond the statistics obtained from the regular 1980 census questionnaires. In April 1978, the Bureau tested the supplementary questionnaire on the Ute Mountain and Southern Ute Reservations in Colorado. The final content and procedures were determined after reviewing the results of this test and recommendations made by the American Indian and Alaska Native community and Federal agencies.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233.

RELATED SUPPLEMENTARY QUESTIONNAIRE MATERIALS

Plans are to produce a Summary Tape File (STF) providing statistics similar to those published in this report for the American Indian, Eskimo, and Aleut populations. The STF will include greater subject and/or geographic detail than is feasible to provide in the printed report. In addition, plans are to provide a Public-Use Microdata file of the supplementary questionnaire information. The Public-Use Microdata sample is a computerized file containing most population and housing characteristics as shown on a sample of individual supplementary questionnaire records. The file will contain no names or addresses, and the geographic identification is sufficiently broad to protect confidentiality. The geography for this file includes total reservations, total Historic Areas of Oklahoma (excluding urbanized areas), and Arizona. Microdata files allow the user to prepare customized tabulations. The preparation of the STF and the Public-Use Microdata file is a cooperative effort of the Census Bureau and the Department of Health and Human Services.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations may appear in the tables:

- A dash “—” represents zero or a percent which rounds to less than 0.1. Also, a dash “—” is used because the number of supplementary questionnaires for the reservations listed below was insufficient to produce reliable estimates.

Agua Caliente Reservation, Calif.
Hopland Rancheria, Calif.
Kootenai Reservation, Idaho
Mille Lacs Reservation, Minn.
Onondaga Reservation, N.Y.
San Manuel Reservation, Calif.
Skull Valley Reservation, Utah
Torres-Martinez Reservation, Calif.
Tuscarora Reservation, N.Y.
Woodfords Community, Calif.
Other reservation lands in Montana

- Three dots " . . ." mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals. (For further information on disclosure, see the section below on "Suppression of Data for Confidentiality.")

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Bureau of the Census takes precautions that its published data do not disclose information about specific individuals and housing units. To accomplish this the Census Bureau suppresses data for characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression, as defined below, may take place.

The general rules of primary suppression of sample data are as follows: estimates of total population by race are

never suppressed; other characteristics, including American Indian tribes, for persons are shown only if there are 30 or more American Indians or 30 or more American Indians, Eskimos, or Aleuts in the geographic area; estimates of total housing units, vacant housing units, year-round units and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are 10 or more year-round housing units in the geographic area; characteristics of families, households, or occupied housing units are shown only if there are at least 10 occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least 10 and the number of renters is also at least 10. These primary suppression criteria are applied independently of one another. The comparable figures for complete count (100-percent) data are 15 or more persons and 5 or more housing units of the specified type.

Population and occupied housing unit characteristics cross-classified by race or tribe (of the householder and householder or spouse) are subject to an additional level of examination. This level requires the 30 person or 10 housing unit criterion be applied individually to each race category.

Finally, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction.

Population and housing unit counts are shown for the following reservations

and rancherias; however, all characteristics for these areas have been suppressed because they have less than 30 American Indians, Eskimos, and Aleuts and less than 10 housing units with an American Indian, Eskimo, or Aleut householder.

Alturas Rancheria, Calif.
Benton Paiute Reservation, Calif.
Big Bend Rancheria, Calif.
Big Lagoon Rancheria, Calif.
Cabazon Reservation, Calif.
Cachil Dehe Rancheria, Calif.
Cederville Rancheria, Calif.
Cortina Rancheria, Calif.
Coushatta Reservation, La.
Cuyapaape Reservation, Calif.
Deer Creek Reservation, Minn.
Eastern Pequot Reservation, Conn.
Enterprise Rancheria, Calif.
Golden Hill Reservation, Conn.
Hassanamisco Reservation, Mass.
Jackson Rancheria, Calif.
La Posta Reservation, Calif.
Lookout Rancheria, Calif.
Manzanita Reservation, Calif.
Montgomery Creek Rancheria, Calif.
Ozette Reservation, Wash.
Resighini Rancheria, Calif.
Roaring Creek Rancheria, Calif.
Rumsey Rancheria, Calif.
Sac and Fox Reservation, Kans.-Nebr.
Santa Rosa Reservation, Calif.
Schaghticoke Reservation, Conn.
Sheep Ranch Rancheria, Calif.
Sherwood Valley Rancheria, Calif.
Summit Lake Reservation, Nev.
Tunica-Biloxi Reservation, La.
Western Pequot Reservation, Conn.
XL Ranch Reservation, Calif.

CORRECTION NOTE

Shown below are correction and/or explanatory statements for selected tables in this report.

American Indian Reservations

Table 11. Summary of Housing Characteristics For Housing Units With an American Indian, Eskimo, or Aleut Householder or Spouse for Identified Reservations: 1980

Data should not have been suppressed for any reservations in the columns "Housing units with an American Indian, Eskimo, or Aleut householder or spouse" and "Housing units with an American Indian, Eskimo, or Aleut householder." The suppressed figures may be obtained by writing to Racial Statistics Branch, Population Division, Bureau of the Census, Washington, D.C. 20233 or from the forthcoming PCBO-2-10, Part 2 report, American Indians, Eskimos, and Aleuts on Identified Reservations and in the Historic Areas of Oklahoma (Excluding Urbanized Areas).

Historic Areas of Oklahoma (Excluding Urbanized Areas)

Tables 12 - 20

In tables 12 through 20, data for persons reporting "Apache" tribe were included in both the Apache and Fort Sill Apache tribal governments in Caddo County. Data for persons reporting "Apache" should have been distributed between the two tribal governments for the tribal government tabulation.

The explanatory note below provides information on the universes for tables 12 through 20 which present data for total Historic Areas of Oklahoma (excluding urbanized areas), tribal governments, selected tribes, and counties.

The universes for person characteristics for tables 12 through 20 are as follows:

<u>AREA</u>	<u>UNIVERSE</u>
Total historic areas (excluding urbanized areas)	American Indian, Eskimo, and Aleut
Tribal governments	American Indian who reported specified tribe of government
Selected tribes	American Indian who reported specified tribe
Counties	American Indian, Eskimo, and Aleut

The universes for housing unit, household, and family characteristics for tables 15, 18, 19, and 20 are given in the chart below.

Area	Universe		
	Families with one or more American Indian, Eskimo, or Aleut	American Indian, Eskimo, or Aleut householder or spouse	American Indian, Eskimo, or Aleut householder
Total historic areas, excluding urbanized areas	Families with at least one person who reported American Indian, Eskimo, or Aleut.	Householder or spouse is American Indian, Eskimo, or Aleut.	Householder is American Indian, Eskimo, or Aleut.
Tribal governments	Not applicable.	Householder is American Indian and reported specified tribe of government.	Householder is American Indian and reported specified tribe of government.
<u>OR</u>			
		Householder is non-Indian and has an American Indian spouse with specified tribe of government.	
<u>OR</u>			
		Householder is American Indian with not reported tribe and has an American Indian spouse with specified tribe of government.	
Selected tribes	Not applicable.	Householder is American Indian and reported specified tribe.	Householder is American Indian and reported specified tribe.
<u>OR</u>			
		Householder is non-Indian and has an American Indian spouse with specified tribe.	
<u>OR</u>			
		Householder is American Indian with not reported tribe and has an American Indian spouse with specified tribe.	
Counties	Families with at least one person who reported American Indian, Eskimo, or Aleut.	Householder or spouse is American Indian, Eskimo, or Aleut.	Householder is American Indian, Eskimo, or Aleut.

TABLE 1. RACE AND SEX OF PERSONS IN HOUSEHOLDS FOR IDENTIFIED RESERVATIONS: 1980

Appendix A.—Area Classifications

CENSUS REGIONS

Regions are large groups of States that form the first-order subdivisions of the United States for census purposes. The four regions are the Northeast, North Central, South, and West. The divisions and States where the identified reservations are located are included in the respective region in table 2.

STANDARD FEDERAL ADMINISTRATIVE REGIONS

The Office of Management and Budget announced the establishment of 10 Standard Federal Administrative Regions in Circular A-46, Exhibit M, August 21, 1972. The identified reservations included in each Standard Federal Administrative Region are shown in table 3.

DIVISIONS

Divisions are groups of States which are subdivisions of the four census regions. There are nine geographic divisions. The States where the identified reservations are located are included in the respective division in table 2.

STATES

The 50 States and the District of Columbia are the constituent units of the United States. However, information are shown

in this report for only the 33 States with Federal or State identified reservations.

IDENTIFIED AMERICAN INDIAN RESERVATIONS

American Indian reservations are areas with boundaries established by treaty, statute, and/or executive or court order. There were 278 American Indian reservations, and their boundaries were identified for the 1980 census by the Bureau of Indian Affairs (BIA) and State governments. The Federal and State reservations are located in 33 States and may cross State, county, minor civil division/census county division, and place boundaries. Three reservation areas are composed of lands that are jointly administered and/or claimed by two reservations—San Felipe/Santa Ana Joint Area, New Mexico; San Felipe/Santo Domingo Joint Area, New Mexico; and other reservation lands in Montana.

IDENTIFIED HISTORIC AREAS OF OKLAHOMA (Excluding Urbanized Areas)

The historic areas of Oklahoma (excluding urbanized areas) consist of the former reservations which had legally established boundaries during the period 1900-1907. These reservations were dissolved during the two-to-three year

period preceding the statehood of Oklahoma in 1907. The former reservation boundaries are used for planning purposes by tribes and the Federal government. In the census, the entire area encompassing the former reservations was identified (excluding urbanized areas); individual former reservations were not identified separately. The parts inside urbanized areas were approximated in preparation for the 1980 Census. The historic areas of Oklahoma (excluding urbanized areas) were not identified in previous censuses.

OKLAHOMA TRIBAL GOVERNMENTS

The Oklahoma Tribal Governments shown in this report include Oklahoma tribes in selected counties designated by the Bureau of Indian Affairs where tribal governments have individual or tribal trust lands and perform "substantial governmental functions;" as designated under the General Revenue Sharing Program. Also shown in this report are 6 federally recognized tribes ineligible under this program.

SELECTED TRIBES

The selected tribes shown in this report include those tribes in the historic areas of Oklahoma (excluding urbanized areas) with 400 or more American Indians.

POPULATION CHARACTERISTICS

TRANSCRIPTION ITEMS (REGULAR CENSUS QUESTIONNAIRES)

Responses to the questions on race, household relationship, sex, age, and marital status, from the 1980 census short-form questionnaire were transcribed to the corresponding supplementary questionnaire. The items pro-

vide basic demographic information and were transcribed to the supplementary questionnaire so respondents would not be asked the same questions twice.

Race

The data on the American Indian, Eskimo, Aleut, White and "Other races" populations were derived from question 4, of the regular short census questionnaire.

The concept of race as used by the Census Bureau reflects self-identification by respondents; it does not denote any clear-cut scientific definition of biological stock. Since the 1980 census obtained information on race through self-identification, the data represent self-classification by people according to the race with which they identify.

For persons who could not provide a single response to the race question, the race of the person's mother was used; if a single response could not be provided for the person's mother, the first race reported by the person was used. This is a modification of the 1970 census procedure when the race of the person's father was used.

The categories "American Indian," "Eskimo," and "Aleut" include persons who classified themselves as such in one of the specific race categories. In addition, persons who did not report themselves in one of the specific race categories but entered the name of an Indian tribe or reported such entries as Canadian Indian, French-American Indian, or Spanish-American Indian were classified as American Indian.

The category "White" includes persons who indicated their race as White, as well as persons who did not classify

themselves in one of the specific race categories listed on the questionnaire but entered a response such as Canadian, German, Italian, Lebanese, or Polish. In the 1980 census, persons who did not classify themselves in one of the specific race categories but marked "Other" and wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican were included in the "Other" race category. In the 1970 census, most of these persons were included in the "White" category.

The category "All other races" includes all persons not classified as "American Indian," "Eskimo," "Aleut," or "White."

Race Edit and Allocation

If the race entry was missing on the questionnaire for a member of a household, an answer was assigned in the computer according to the reported entries of race of other household members using specific rules of precedence of household relationship. If race was not entered for anyone in the household (excluding paid employees), the race of a householder in a previously processed household was assigned. This procedure is a variation of the general allocation process described in Appendix D, "Accuracy of the Data."

Comparability Between 1980 Census Regular Short and Long Form Questionnaires and Supplementary Questionnaires Population Totals for the American Indian, Eskimo, and Aleut Population

The 1980 census population totals for American Indians, Eskimos, and Aleuts shown in this report differ from those published in other reports such as *General Population Characteristics*, PC80-1-B, which are based on 100-percent tabulations and *General Social and Economic Characteristics*, PC80-1-C, which are from sample tabulations based on the regular census sample. The regular census sample was approximately 19 percent of all households. The data in

this report are based on a sample of approximately 80 percent of households with one or more American Indians, Eskimos, or Aleuts on identified reservations and in the historic areas of Oklahoma (excluding urbanized areas). (For details concerning the sample design for the Supplementary Questionnaire Program, see Appendix C, General Enumeration and Processing Procedures.) A comparison of the 100-percent, sample, and supplementary questionnaire distributions of the American Indian, Eskimo, and Aleut populations for identified reservations and historic areas of Oklahoma (excluding urbanized areas) are presented in table A. The sample estimates from both the regular census long form and the supplementary questionnaire were slightly lower than the 100-percent count for identified reservations and historic areas. The supplementary questionnaire estimate was slightly lower than the regular census sample estimate.

Data in this report for a few reservations and two counties—Canadian and Kingfisher Counties—in the historic areas of Oklahoma (excluding urbanized areas) include corrections made after the final 1980 census tabulations were completed. These corrections are not included in the Volume 1, *Characteristics of the Population and Characteristics of Housing Units*. The corrections to the 100-percent tabulations were published in supplementary report, *American Indian Areas and Alaska Native Villages: 1980*, PC80-S1-13.

Table A. Comparability Between 1980 Census Regular Short and Long Form Questionnaires and Supplementary Questionnaires Population Totals for the American Indian, Eskimo, and Aleut Population: 1980

[Minus sign (-) denotes decrease]

On Identified Reservations and in the Historic Areas of Oklahoma (Excluding Urbanized Areas)	Regular Census questionnaires		Supplementary questionnaire	Difference between 100-percent and regular sample data		Difference between 100-percent and supplementary questionnaire data

Household, Relationship to Householder, Unrelated Individual, and Family

Household

Household includes all the persons who occupy a housing unit. The measure "Persons per household" is obtained by dividing the number of persons in households by the number of households (or householders).

Relationship to Householder

The data on relationship to householder were derived from answers to question 2, which was asked of all persons in housing units.

Householder—One person in each household is designated as the "Householder." In most cases, this is the person, or one of the persons, in whose name the home is owned or rented and who is listed in column 1 of the census questionnaire. If there is no such person in the household, any adult household member could be designated as the "Householder." Two types of householders are distinguished—a family householder and a nonfamily householder. A family householder is a householder living with one or more persons related to him or her by birth, marriage, or adoption. The householder and all persons in the household related to him or her are family members. A nonfamily householder is a householder living alone or with nonrelatives only.

Spouse—A person married to and living with a householder. This category includes persons in formal marriages as well as persons in common-law marriages.

Child—A son, daughter, stepchild, or adopted child of the householder regardless of the child's age or marital status. The category excludes sons-in-law and daughters-in-law. "Own children" are sons and daughters, including stepchildren and adopted children, of the householder who are single (never married) and under 18 years of age.

The number of children "Living with two parents" includes stepchildren and adopted children as well as sons and daughters born to the couple.

"Related children" in a family include own children and all other persons under 18 years of age in the household, regardless of marital status, who are related to the householder by birth, marriage, or adoption, except the spouse of the householder.

Other Relative—Any person related to the householder by birth, marriage, or adoption, who is not shown separately in the particular table (e.g., "spouse," "child," "brother or sister," or "parent").

Nonrelative—Any person in the household not related to the householder by birth, marriage, or adoption. Roomers, boarders, partners, roommates, paid employees, wards, and foster children are included in this category.

Unrelated Individual

An unrelated individual is (1) a householder living alone or with nonrelatives only, (2) a household member who is not related to the householder, or (3) a person living in group quarters who is not an inmate of an institution.

Family

A family consists of a householder and

one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. All persons in a household who are related to the householder are regarded as members of his or her family. A "married-couple family" is a family in which the householder and spouse are enumerated as members of the same household. Not all households contain families, because a household may be composed of a group of unrelated persons or one person living alone. The measure "persons per family" is obtained by dividing the number of persons in families by the total number of families (or family householders).

In this report, the data for reservations are presented for households and families with an "American Indian, Eskimo, or Aleut householder or spouse" as well as for households and families with an "American Indian, Eskimo, or Aleut householder." The category "American Indian, Eskimo, or Aleut householder or spouse" includes all households where the householder or spouse is American Indian, Eskimo, or Aleut. The category "American Indian, Eskimo, or Aleut householder" includes only households where the householder is American Indian, Eskimo, or Aleut regardless of the race of the spouse.

In the tables for Oklahoma, the data are shown for the category "American Indian householder or spouse" which includes all households where the householder or spouse is American Indian and for the category "American Indian householder" which includes only households where the householder is American Indian, regardless of the race of the spouse.

Data for the selected tribes in the tables for Oklahoma are shown for the category "American Indian householder or spouse," which includes all households where the householder or spouse is American Indian and reported the name of the specific tribe.

Sex

The data on sex were derived from

answers to question 3, which was asked of all persons.

Age

The data on age were derived from answers to question 5, which was asked of all persons. Only the information in items 5b and 5c (on month and year of birth) was keyed into the computer. Answers to item 5a (on age at last birthday) were used during field review to fill in any blanks in question 5c. The age classification is based on the age of the person in completed years as of April 1, 1980. The data on age represent the difference between date of birth and April 1, 1980.

The median ages shown in this report were computed on the basis of more detailed intervals than shown in the tables. If the median fell in the terminal category of an age distribution, the method of presentation was to show the initial age of the terminal category followed by a plus sign; thus, if the median fell in the category "85 years and over," it is shown as "85+."

Marital Status

The data on marital status were derived from answers to question 6. The marital status classification refers to the status at the time of enumeration. Persons classified as "Now married" include those who have been married only once and have never been widowed or divorced as well as those currently married persons who remarried after having been widowed or divorced. Persons reported as separated are those living apart because of marital discord, with or without a legal separation. Persons in common-law marriages are classified as now married, persons whose only marriage had been annulled are classified as never married, and all persons under 15 years old are classified as never married. All persons classified as never married are shown as "Single" in this report.

SUPPLEMENTARY QUESTIONNAIRE ITEMS

Tribal Affiliation

The data on tribe were derived from responses to question 10. American Indians were asked to report the tribe in which enrolled. "Enrolled" is defined as having met the membership requirements of the tribe and included on the tribe's membership rolls. American Indians who were not enrolled in a tribe were asked to report their principal tribe. The American Indian Tribal Classification List is shown at the end of this appendix. The American Indian Tribal Classification List was developed by persons of the Smithsonian Institution.

In preparing the list, the Smithsonian staff used a number of sources and materials and consulted with other knowledgeable persons in the American Indian community. After the list was prepared, the Census Bureau sent it to all American Indian tribal governments and to organizations in the American Indian community to be reviewed for accuracy and completeness. The Bureau finalized the list for the 1980 census, based on the comments received. Since the tribal classification list was substantially revised and expanded, data on tribes, for the most part, are not comparable with previous censuses.

Tribal Enrollment

The data on tribal enrollment were derived from responses to question 11. American Indians were classified as "enrolled" if they reported that they were enrolled in the same tribe given in question 10; those who reported that they were not enrolled were classified as such, and American Indians who did not respond to the question are shown in the "not reported" category in the tables of this report.

School Enrollment

The data on school enrollment were derived from questions 12a, 12b, and 13. Persons are classified as enrolled

in school if they reported attending a regular school or college at any time between February 1, 1980, and the time of enumeration. Regular schooling is defined as nursery school, kindergarten, elementary school, and schooling which leads to a high school diploma or college degree. Schooling in trade or business schools, company training, or through a tutor was to be reported only if the course credits obtained were regarded as transferable to a regular elementary school, high school, or college. Children were to be reported as enrolled in nursery school if the school included instruction as an integral phase of its program but not if only custodial care was given. Children in Head Start programs were to be reported in nursery school or kindergarten as appropriate. Elementary school, as defined here, includes grades 1 through 8, and high school includes grades 9 through 12.

The definitions of the types of school shown in this report are as follows:

Tribal school; tribal college is a school operated or controlled by the tribe or tribal government. Schools operated by the tribe under contract with the Bureau of Indian Affairs are included in this category.

Bureau of Indian Affairs day school is a school or college operated and controlled by the Bureau of Indian Affairs where children come to school during the day while living at home.

Bureau of Indian Affairs boarding school is a school or college operated and controlled by the Bureau of Indian Affairs where children live on the premises while attending school.

Other public school is any school or college which is controlled and supported primarily by a local, State, or Federal government (other than a Bureau of Indian Affairs school).

Other private school is any school or college which is controlled and supported primarily by a religious organization or by private persons or groups, (excluding those previously identified as a tribal school).

Years of School Completed

The data on years of school completed were derived from answers to questions 13 and 14. These questions on educational attainment applied only to progress in "regular" schools as defined under the definition of school enrollment. The first question asked for the highest grade (or year) attended, regardless of "skipped" or "reported" grades. Persons whose education was received in a foreign school system or an ungraded school were instructed to report the approximate equivalent grade in the regular American school system. Persons who finished high school by an equivalency test (GED) and did not attend college were instructed to mark grade 12 (high school, 4 years).

The second question on educational attainment asked if the highest grade (or year) attended has been finished. The number in each category of highest grade of school completed represents a combination of (a) persons who reported the indicated grade as highest grade attended and that they had finished it, (b) those who had attended the next highest grade, but had not finished it, and (c) those still attending the next highest grade. Persons who have not completed the first year of elementary school are classified as having no years of school completed.

"Percent high school graduates" includes persons who completed four years of high school and those who completed one or more years of college.

Place of Residence 1 Year Ago

The data on residence 1 year ago were derived from answers to questions 15a and 15b. Residence on April 1, 1979, is the usual place of residence 1 year before enumeration. Residence 1 year ago is used in conjunction with current residence to determine the extent of residential mobility of the population. The category "Yes, this house" includes all persons 1 year old and over who did not move during the last year. For those persons classified as "No, different

Appendix B---Definitions and Explanations of Subject Characteristics

house," information is presented as to where they lived 1 year ago. "On this reservation" includes persons living in a different house, but on the same reservation 1 year ago. "On another reservation" refers to persons living on a different reservation 1 year ago. "Off reservation" includes persons who did not live on a reservation 1 year ago.

Year Moved Onto Reservation

The data on year moved onto reservation were derived from answers to question 16. Data presented for this question refer to the year of the most recent move to *this* reservation. If the person moved off the reservation and then moved back again, the year of the most recent move was recorded. "Always lived on this reservation" includes persons who never lived on any other reservation or anywhere else. "Now living in Oklahoma outside the Osage Reservation" refers to persons living within the historic areas of Oklahoma.

Health Services

The data on health services were derived from answers to questions 17a-17i. Persons were asked if they received medical and/or dental services since March 1, 1980. Persons were classified as receiving health services if:

- (a) There was a visit by the person to the health care provider (doctor, nurse, and so forth), for treatment or examination. This includes visits to the provider's office, a clinic, a medical center or a hospital (either as an inpatient or an outpatient).
- (b) There was a visit by the health care provider (nurse, medic, and so forth), to the person. If the health care provider visits the household to see one patient and while there examines or visits professionally another member of the household, this visit was counted for each individual receiving the provider's attention.
- (c) There was a telephone call to or from

a health care provider, including calls to obtain or renew a prescription. Requests for appointments or inquiries about a bill were not included.

- (d) The person in question is a health care provider and treated him/herself.
- (e) The person talked informally with a family member or friend who is a health care provider to obtain advice.

The definitions of the categories included in this report are as follows:

- (a) *Doctor*—a medical practitioner with an M.D. or D.O. (Doctor of Osteopathy) degree, including Ophthalmologists. Chiropractors, chiropodists, podiatrists, and optometrists were not included.

General practitioners and specialists were included. A general practitioner is a medical doctor who does not limit his/her practice to a specialty.

A specialist is a medical doctor who limits his/her practice to certain groups of people (children, women, and so forth), certain conditions (diabetes, arthritis, and so forth), certain parts of the body (eyes, ears, nose and throat, and so forth) or special procedures (anesthesia, radiology, and so forth).

- (b) *Dentist*—a person who has been trained in the prevention, diagnosis, and treatment of diseases of the teeth and adjacent tissues. For example, oral surgeon, orthodontist, periodontist, and dental hygienist were included.

- (c) *Nurse*—a person trained to care for and wait upon the sick or infirm and assist doctors, and so forth. Registered nurses (RN) and licensed practical nurses (LPN) were included.

- (d) *Pharmacist*—a person trained in the practice of preparing and preserving drugs, and of compounding and dispensing medicine.

(e) *Community Health Representative (CHR)*—a person employed by the tribe and trained by the Indian Health Service to provide outreach assistance to persons in the community.

(f) *Midwife*—a person who assists during childbirth.

(g) *Physician Assistant or Medic*—a person trained to administer primary health care to individuals living in isolated areas.

(h) *Community Health Aide*—a person trained as an outreach worker to provide health care education and other services to Alaska Natives.

(i) *Other*—any response not classified in the categories listed above.

Usual Source of Health Care

The data on usual source of health care were derived from answers to question 18a. "Usual source" refers to the place where persons received the *most* health care in the last twelve months. The definitions of the categories shown in this report are as follows:

Indian Health Service (IHS) clinic, health center or hospital—any facility operated under the jurisdiction of IHS.

Tribal clinic or hospital—health facilities operated under the jurisdiction of a tribal government.

Private physician or dentist—an office of a doctor, or dentist, or group of doctors in private practice.

Government (Federal, State, county, or city) clinic or hospital—health facilities operated under the listed government bodies (other than Indian Health Service facilities).

Other—Any response that cannot be classified in the categories listed above.

Did not seek health care—the person received no health care during the last 12 months.

Travel Time to Health Care Facility

The data on travel time to health care facility were derived from answers to question 18b. Data on travel time includes persons who reported seeking health care in the last 12 months. Travel time to health care facility refers to how long it usually took to get from the person's home to the health facility (length of time for a one-way trip).

Payment for Health Care

The data on payment for health care were derived from answers to question 19. Data on payment for health care includes persons who reported seeking health care in the last 12 months.

Definitions of the categories are as follows:

Received from Indian Health Service or tribe at no cost—the health care was received at any Indian Health Service (IHS) clinic, health center or hospital, by IHS contract services, or at tribally operated clinics or hospitals.

Medicare—the Medicare program is a Federal health insurance plan designed to provide medical care for the aged and disabled. The plan also covers many persons under 65 years old who received Social Security or Railroad Retirement benefits based on long-term disability.

Medicaid—the Medicaid program furnishes medical assistance for needy families with dependent children, and to aged, blind, or permanently and totally disabled individuals with resources insufficient to meet the cost of necessary medical services. The program is administered by State agencies and is paid by a combination of Federal, State, and local funds. Eligibility rules for this program vary from state to state.

Received from other governmental source at no cost—the health care was covered by a government program other than Medicare or Medicaid or Indian Health Service such as Veterans Administration and the National Health Ser-

vice Corps (Department of Health and Human Services).

Received from private source at no cost—the health care was paid for with money from private contributions, programs through foundations, and so forth.

Private health insurance (For example: Aetna, Blue Cross, Health Maintenance Organization, Kaiser, or other health plan)—a health insurance plan is specifically designed to pay all or part of the hospital, doctor, surgeon, or medical expense of the insured individual. The plan, to be considered as insurance, must be a formal one with defined membership and benefits.

Paid for by person or other member of family—health care was paid for by the individual receiving the care or by another family member.

Other—any response that cannot be classified in the categories listed above.

Labor Force Status in 1979

The data on labor force status in 1979 were derived from answers to question 21. Persons 16 years old and over at the time of the census are classified as "In labor force in 1979" if they worked in 1979 or had any weeks of unemployment in 1979; all other persons 16 years old and over are classified as "Not in labor force in 1979." Persons in the labor force in 1979 are classified into the following two categories:

- (1) *Paid job or a business or farm*—work at a paid job or in a business or farm includes any work for pay or profit (including weeks on paid vacation or on paid sick leave) or work without pay in a business or farm run by a relative or by the tribe or active duty in the Armed Forces..
- (2) *Traditional work*—this includes any time spent raising crops and/or livestock or making things to sell or trade such as rugs, pottery, jewelry, and so forth. Information on receipt of cash income is also shown for persons classified as doing traditional work. The data on cash

income were derived from question 21c and includes wages or salary and self-employment income. In addition to what is ordinarily considered wage or salary income such things as piece-rate payments, commissions, tips, bonuses, and Armed Forces pay are also included as well as income received from own business, professional practice, or farm.

Weeks Worked in 1979—These data were derived from question 21b. The data refer to the number of weeks during 1979 in which a person did any work for pay or profit (including paid vacation and sick leave), or worked without pay on a family or tribal farm or in a family or tribal business, or weeks of active service in the Armed Forces.

Main Reason for Not Working a Full Year in 1979

The data on *main reason* for working fewer than 50 weeks in 1979 were derived from question 22. These data are shown for persons 16 years and over at the time of the census who worked 1-49 weeks in 1979. The reasons for working fewer than 50 weeks in 1979 shown in this report are:

Personal reasons—includes reasons such as illness in the family, own illness or disability, pregnancy, child care, school, retirement, moving, marriage, and so forth.

Seasonal job completed—the job ended because the season was over. This occurs regularly in such industries as farming, logging, fishing, construction, the garment industry, and retail selling.

Slack work or business conditions—the job ended, either permanently or temporarily, because work was no longer available for reasons other than that the season was over. Examples are job eliminated, no need for services, laid off, reductions in force, and so forth.

Temporary nonseasonal job completed—includes persons who took a job with the knowledge that it was temporary.

Appendix B.--Definitions and Explanations of Subject Characteristics

Examples include just working temporarily, helping out for a while, substitute teaching, and so forth.

Unsatisfactory work arrangements—persons who left their jobs voluntarily because they were dissatisfied with their working conditions. Examples of reasons include hours too long, pay too low, and so forth.

Could not find work—persons who tried to find work, or tried to start a business or profession during 1979, but could not.

Bad weather conditions—persons prevented from working part of the year (1979) because of "bad weather."

Did not want work—persons who did not want work.

Other—includes persons who could not be classified in any of the above categories. Examples include "started job during the year," "labor dispute," and so forth.

Weeks of Unemployment in 1979

The data on weeks of unemployment were derived from answers to question 23. Weeks of unemployment in 1979 pertain to the number of weeks during 1979 in which a person 16 years old and over did not work but spent any time looking for work (that is, trying to get a job or start a business or professional practice) or on layoff from a job. Excluded from weeks of unemployment are any weeks in which the person worked, even for one hour; or any weeks for which the person received any wages or salary; or in which the person was on active duty in the Armed Forces, on paid vacation, or on paid leave.

Date Last Worked

Data on date last worked were derived from answers to question 24. The date last worked is the most recent year in which the person did any work at all, even for a few days, and not the year last worked at a full-time job.

"Now working" includes persons who were working at the time of the census. "Never worked" includes persons who never worked at any kind of job or in a business or farm, either full time or part time, have never done unpaid work in a family business or on a family farm, never raised crops and/or livestock, or made things to sell or trade, and have never served in the Armed Forces.

Occupation, Industry, and Class of Worker

The information on the industry and occupation were obtained from questions 24, 25, and 26. The data are shown for persons 16 years old and over "Working in 1980 reference period." "Working in the 1980 reference period" includes persons 16 years old and over who were "Now working" at the time of the census and persons who last worked in 1980.

Occupation Classification System

The system developed for the 1980 census consists of 503 specific occupation categories arranged into 6 summary and 13 major occupation groups. This classification was developed to be consistent with the 1980 *Standard Occupational Classification Manual* (SOC), published by the U.S. Department of Commerce, Office of Federal Statistical Policy and Standards. This is the first time there was a United States standard to use in developing the census occupational classification.

In addition to the standard occupations, 24 "traditional" American Indian occupations were added to the list for the supplementary questionnaire program.

The SOC Manual presents a list of 12 principles used in occupational classification. The primary principles used were as follows: 1) the classification should realistically reflect the current occupational structure of the United States, and 2) an occupation should be classified on the basis of work performed. The conversion of the census classification to the SOC has caused the 1980 census classification to be less comparable with the classifications used in earlier censuses.

This report presents selected groupings of the 503 categories. The most detailed tabulation contains 47 occupation data lines, which are shown below with their component categories and the SOC code definition of each category in parentheses. The lines marked with an asterisk (*) are the remainder of major occupation groups, not shown in the report. The 1980 Census of Population: *Classified Index of Industries and Occupations* (IPHC80-R4), 1982, U.S. Government Printing Office, Washington, D.C., provides information on the composition of the detailed categories.

Executive, Administrative, and Managerial Occupations (11-14)

Officials and administrators, public administration (11)—Includes legislators, chief executives, general administrators, and administrators, protective services.

Management related occupations (14)—Includes accountants; auditors; financial officers; management analysts; personnel, training, and labor relations specialists; buyers and purchasing agents; business and promotion agents; and inspectors and compliance officers, including construction.

***Officials and administrators, other** (12, 13)—Includes financial, personnel and labor relations, purchasing, marketing, advertising, and public relations managers; education and health administrators; property and real estate managers; postmasters and mail superintendents; and funeral directors.

Professional Specialty Occupations (16-34, 398)

Engineers and natural scientists (16-18)—Includes architects, engineers, surveyors, mathematicians, and natural scientists.

Engineers (162, 163)—Includes aerospace, metallurgical, mining, petroleum, chemical, nuclear, civil, agricultural, electrical and electronic, industrial, mechanical, and marine engineers, and naval architects.

***Architects, surveyors, mathematicians, and natural scientists** (161, 164, 17, 18)—Includes architects,

Appendix B.—Definitions and Explanations of Subject Characteristics

surveyors, and mapping scientists; computer systems analysts; operations and systems researchers and analysts; actuaries, mathematicians, and statisticians; physicists, geologists, and chemists except biochemists; and atmospheric, space, agricultural, biological, forestry, conservation, and medical scientists.

Health diagnosing occupations (26-28)—Includes physicians, dentists, veterinarians, optometrists, and podiatrists.

Health assessment and treating occupations (29, 30)—Includes registered nurses, pharmacists, dietitians, therapists, and physicians' assistants.

Teachers, librarians, and counselors (22-25)

Teachers, elementary and secondary schools (231-233)—Includes prekindergarten, kindergarten, elementary, and secondary school teachers, but excludes principals and supervisors.

**Other teachers, librarians, and counselors* (22, 235, 236, 239, 24, 25)—Includes teachers, except elementary and secondary schools, vocational and educational counselors, librarians, archivists, and curators.

**Other professional specialty occupations* (19-21, 32-34, 398)—Includes economists, psychologists, sociologists, urban planners, social workers, recreation workers, the clergy and other religious workers, lawyers, judges, editors and reporters, announcers, public relations specialists, photographers, writers, artists, and entertainers.

Technicians and Related Support Occupations (36-39, except 398; 825)

Health technologists and technicians (36)—Includes clinical laboratory, health record, and radiologic technicians; dental hygienists; and licensed practical nurses.

Technologists and technicians, except health (37-39, except 398; 825)—In-

cludes engineering, science, and surveying technicians; drafting occupations; airplane pilots; air traffic controllers; broadcast equipment operators; computer programmers; tool programmers, numerical control; and legal assistants.

Sales Occupations (40-44)

Supervisors and proprietors, sales occupations (40)

Sales representatives, commodities and finance (41, 42)—Includes insurance, real estate, securities, advertising, and other business service sales occupations; sales engineers; and mining, manufacturing, and wholesale trade sales representatives.

Other sales occupations (43, 44)—Includes retail sales workers; sales counter clerks; cashiers; street and door-to-door sales workers; news vendors; demonstrators, promoters, and models; auctioneers; and sales support occupations.

Cashiers (4364)

Administrative Support Occupations, Including Clerical (45-47)

Computer equipment operators (461)

Secretaries, stenographers, and typists (462)

Financial records processing occupations (471)—Includes bookkeepers; accounting, payroll, billing, and cost clerks; and billing and calculating machine operators.

Mail and message distributing occupations (474)—Includes postal clerks, mail carriers, mail clerks, and messengers.

**Other administrative support occupations* (45, 46 except 461, 462; 47 except 471, 474)—Includes clerical supervisors; interviewers; receptionists; transportation and reservation agents; hotel, classified-ad, correspondence, personnel, library, file, order, and record clerks; duplicating, mail, and office machine operators; telephone operators, telegraphers, and other communications equipment operators;

dispatchers; production coordinators; traffic, shipping, stock and inventory clerks; meter readers; weighers, measurers, and checkers, samplers; expediters; adjusters and investigators; bill and account collectors; eligibility, office, and statistical clerks; bank tellers; proofreaders; data-entry keyers; and teachers' aides.

Private Household Occupations (50)—Includes laundries, cooks, housekeepers, child care workers, and household cleaners and servants.

Protective Service Occupations (51)

Police and firefighters (5123, 5132)—Includes police, detectives, and firefighters.

**Other protective service occupations* (511, 5122, 5133, 5134, 514)—Includes protective service supervisors, fire inspection and prevention occupations, sheriffs and other law enforcement officers, correctional institution officers, and guards.

Service Occupations, Except Protective and Household (52)

Food service occupations (521)—Includes bartenders; cooks; waiters, kitchen, food counter, and fountain workers; and waiters' assistants.

Cleaning and building service occupations (524)—Includes maids and housemen, janitors, elevator operators, and pest control occupations.

**Health and personal service occupations* (523, 525, 526)—Includes dental assistants, nursing and other health aides, orderlies and attendants, barbers, hairdressers and cosmetologists, recreation and public transportation attendants, guides, ushers, baggage porters, bellhops, welfare service aides, and child care workers.

Farming, Forestry, and Fishing Occupations (55-58, part 8241)

Farm operators and managers (55)

Farm workers and related occupations (56)—Includes farm, marine life, culti-

Appendix B.—Definitions and Explanations of Subject Characteristics

vation, and nursery workers; groundskeepers and gardeners; animal caretakers; and graders, sorters, and inspectors, agricultural products.

***Forestry and fishing occupations**(57, 58, part 8241)—Includes forestry and logging workers, fishers, captains of fishing vessels, hunters, and trappers.

Precision Production, Craft, and Repair Occupations(60-71 except part of 68, part 7477, 7668, part 7677, 7752, 828)

Mechanics and repairers (60, 61)—Includes vehicle and mobile equipment, industrial machinery, machinery maintenance, heating, and air conditioning mechanics; electrical and electronic equipment repairers, including telephone and telephone line installers; and camera, watch, musical instruments, office machine, mechanical controls, and valve repairers; locksmiths; elevator installers; and millwrights.

Construction trades (63, 64 except 632)—Includes brickmasons, stonemasons, tile setters, carpet installers, carpenters, drywall installers, electricians, electrical power installers and repairers, painters, paperhangers, plasterers, plumbers, concrete finishers, glaziers, insulation workers, paving equipment operators, roofers, sheet-metal duct installers, structural metal workers, earth drillers, and construction apprentices.

Precision production occupations(67-71 except part of 68, part 7477, 7668, part 7677, 7752, 828)—Includes precision metalworking and woodworking occupations, precision textile and apparel machine workers, precision workers, assorted materials, precision food production occupations, precision inspectors and testers, plant and system operators, and production supervisors.

***Extractive occupations**(632, 65)—Includes oil well drillers, explosives workers, miners and mining machine operators.

Machine Operators, Assemblers, and Inspectors (Part of 68, 73-78)

Machine operators and tenders, except precision(Major parts of 73-76, plus minor part of 68)—Includes metal and plastic working, fabricating, metal and plastic processing, printing, textile and apparel machine operators; machine operators of assorted materials with such functions as blending, cementing, packaging, filtering, paint spraying, washing, etc.; motion picture projectionists; and photographic process machine operators.

Fabricators, assemblers, inspectors, and samplers(77 except 7752, 78, plus minor parts of 73 and 75)—Includes welders, solderers, assemblers; hand-cutting, molding, painting, engraving, and miscellaneous hand working occupations; and production inspectors, testers, samplers, and weighers.

Transportation and Material Moving Occupations (811, 821, 823, 824, except part of 8241, 83, 874)

Transportation occupations (811, 821, 823, 824, except part of 8241, 874)

Motor vehicle operators(8111, 821, 874)—Includes truck, bus, and taxicab drivers; chauffeurs; driver-sales workers; and parking lot attendants.

***Rail and water transportation occupations**—(8113, 823, 824 except part 8241)—Includes railroad conductors, yardmasters, brake, signal, and switch operators; rail vehicle operators; locomotive operation occupations; ship captains, except fishing vessels; sailors and deckhands; bridge, lock, and lighthouse tenders.

Material moving equipment operators (812, 83)—Includes operating engineers; longshore equipment, hoist, and crane and tower operators; excavating machine operators including dozers; and industrial truck and tractor equipment operators.

Handlers, Equipment Cleaners, Helpers, and Laborers(85-87, except 874)

Construction laborers(871)

Freight, stock, and material handlers (872)—Includes garbage collectors,

stevedores, stock handlers and baggers, machine feeders, and other material handlers.

***Other handlers, equipment cleaners, helpers, and laborers** (85, 86, 873, 875, 87)—Includes mechanic, construction, extractive, and production helpers; garage and service station related workers; vehicle washers; hand packers; and laborers, except construction.

The highest level of aggregation provided by the SOC is six summary groupings. These six groupings are shown below with their component two digit SOC codes shown in parentheses.

Managerial and professional specialty occupations (11 – 34)

Technical, sales, and administrative support occupations (36 – 47)

Service occupations (50 – 52)

Farming, forestry, and fishing occupations (55 – 58)

Precision production, craft, and repair occupations (60 – 71)

Operators, fabricators, and laborers (73 – 87)

Traditional Occupations

Tribal Government Occupations

Officials and Administrators—Includes tribal chairpersons, governors, lieutenant governors, presidents, principal chiefs, representatives, spokespersons, and village chiefs.

Legislators—Includes tribal council persons.

Judicial Administrators—Includes tribal judges.

Artist and Performer Occupations

Dancers—Includes buckskin, fancy, hoop, kachina, shawl, straight, team, and traditional dancers.

Drummers and Singers—Includes drummers, northern, southern, stomp dance, and peyote singers.

Appendix B.—Definitions and Explanations of Subject Characteristics

Painters—Includes sand and any other specified painters.

Potters—Includes clay and any other specified potters.

Handworking Occupations

Basket Makers—Includes cedar, bark, reed, and any other specified basket makers.

Beaders—Includes hand, loom, and any other specified beaders.

Bustle Makers—Includes feather and any other specified bustle makers.

Carvers—Includes ivory, soapstone, wood, and any other specified carvers.

Fan Makers—Includes feather and any other specified fan makers.

Moccasin Makers—Includes buckskin, leather, fur, and any other specified moccasin makers.

Quilters—Includes star and any other specified quilters.

Rattle Makers—Includes gourd, peyote, and any other specified rattle makers.

Weavers—Includes belts, blankets, handbags, rugs, and any other specified weavers.

Doll Makers—Includes corn husk, crown dancer, kachina, and any other specified doll makers.

Drum Makers—Includes group, hand, and any other specified drum makers.

Quill Workers—Includes porcupine quills and any other specified quill workers.

Roach Makers—Includes persons who use porcupine hair and any other specified roach makers.

Tanners—Includes buckskin and any other specified tanners.

Other Occupations

Native Healers—Includes medicine persons, shaman, and spiritual healers.

Sheep Workers—Includes persons who herd sheep.

Industry Classification System

The industry classification system developed for the 1980 Census of Population consists of 231 categories classified into 13 major industry groups. Since 1940 the industrial classification has been based on the *Standard Industrial Classification Manual* (SIC). The 1980 census classification was developed from the 1972 SIC published by the Executive Office of the President, Office of Management and Budget, and the 1977 supplement to that manual.

This report presents selected groups of the 231 categories. The most detailed tabulation includes 46 industry data lines, which are shown below with their component categories and the equivalent SIC codes in parentheses after each of the group titles. The lines marked with an asterisk (*) are the remainder of major industry groups, not shown in the report. For readers without access to the SIC, the list below also presents descriptive terms of the content of the categories as required. Major industry group titles are in bold face. The 1980 Census of Population: *Classified Index of Industries and Occupations* (PHC80-R4), 1982, U.S. Government Printing Office, Washington, D.C., provides additional information on the industry classification system.

Agriculture, Forestry, and Fisheries(01, 02, 07-09)

**Agriculture* (01, 02, 07)

**Forestry and fisheries* (08, 09)

Mining(10-14)

Construction(15-17)

Manufacturing(20-39)

**Food and kindred products*(20)—Includes meat, dairy, and grain products; bakery and sugar products; beverage industries; and canning and preserving.

**Textile mill and finished textile products*(22, 23)—Includes textiles, carpets, and apparel.

**Printing, publishing, and allied industries*(27)

**Chemicals and allied products*(28)—Includes synthetic fibers, drugs, soaps, and paints.

**Other nondurable goods* (21, 26, 29-31)—Includes tobacco, paper, petroleum refining and coal, rubber, plastics, and leather products.

**Furniture, lumber, and wood products* (24, 25)—Includes logging, sawmills, mobile home and furniture manufacturing.

**Primary metal industries*(33)—Includes primary iron, steel, and aluminum furnaces, and rolling and finishing mills.

**Fabricated metal industries, including ordnance*(34)

**Machinery, except electrical*(35)—Includes engines, farm machinery, and office and electronic computing equipment.

**Electrical machinery, equipment, and supplies*(36)

**Transportation equipment*(37)

**Other durable goods, including not specified manufacturing* (32, 38, 39)—Includes stone, clay, glass, and concrete products; scientific instruments; optical and health supplies; photographic equipment; watches and clocks; and toys and sporting goods.

Transportation, Communications, and Other Public Utilities(40-49)

**Railroads*(40)

**Trucking service and warehousing*(42)

**Other transportation*(41, 43-47)—Includes urban transit, bus, water, and air transportation, pipelines and transportation services, and the U.S. Postal Service.

**Communications*(48)—Includes radio television, telephone, and telegraph communication services.

**Utilities and sanitary services*(49)—Includes electric, gas, water, and sanitary services.

Appendix B.—Definitions and Explanations of Subject Characteristics

Wholesale Trade(50, 51)

Retail Trade(52-59)

***General merchandise stores(53)**—Includes department stores and variety stores.

***Food, bakery, and dairy stores(54)**

***Automotive dealers and gasoline stations(55)**

***Eating and drinking places(58)**

***Other retail trade (52, 56, 57, 59)**

Finance, Insurance, and Real Estate(60-67)

***Banking and credit agencies(60, 61)**

***Insurance, real estate, and other finance(62-67)**

Business and Repair Services(73, 75, 76)

***Business services(73)**—Includes advertising, research labs, employment agencies, consulting services, computer programming services, and detective services.

***Repair services (75, 76)**—In addition to repair shops, includes automobile rental, parking, and washing services.

Personal Services(70, 72, 88)

***Private households(88)**

***Other personal services(70, 72)**—Includes hotels, garment services, and beauty, barber, dressmaking, and shoe repair shops.

Entertainment and Recreation Services(78, 79)—Includes theaters, motion pictures, bowling alleys, and billiard parlors.

Professional and Related Services (80-87, 89)

***Hospitals(806)**

***Health services, except hospitals(80, except 806)**

***Elementary and secondary schools and colleges(821, 822)**

***Other educational services(823, 824, 829)**—Includes all other schools (correspondence, etc.) and libraries.

***Social services, religious and membership organizations(83, 86)**

***Legal, engineering, and other professional services (81, 84, 89)**

Public Administration(91-97)

Relation of Some Industry Groups to Similar Occupations or Class of Worker.—The industry category "Public administration" is limited to regular government functions such as legislative, judicial, administrative, and regulatory activities of governments. Other government organizations such as schools, hospitals, liquor stores, and bus lines are classified by industry according to the activity in which they are engaged. On the other hand, the class of worker government categories include all government workers.

Some occupation groups are closely related to certain industries. Operators of transportation equipment, farm operators and workers, and private household workers account for major portions of their respective industries of transportation, agriculture, and private households. The industry categories, however, include persons in other occupations. For example, persons employed in agriculture include truck drivers and bookkeepers; persons employed in the transportation industry include mechanics, freight handlers and bookkeepers; and persons employed in the private household industry include occupations such as chauffeur, gardener, and secretary.

Location of Industry

The data on location of industry were derived from responses to question 25c. "On reservation" refers to businesses or organizations located on the reservation, and "Off reservation" refers to businesses or industries located off the reservation.

Class of Worker

The data on class of worker were derived from answers to question 27. The information on class of worker refers

to the same job as a respondent's industry and occupation and categorizes persons according to the type of ownership of the employing organization. The definitions of the class of worker categories shown in this report are as follows:

Private Wage and Salary Workers—private wage and salary workers are persons who worked for a private employer for wages, salary, commission, tips, pay-in-kind, or at piece rates. Self-employed persons whose business is incorporated are included here because they are paid employees of their own companies. The categories "Tribal or Indian-owned business" and "Private company, business or individual" are included as private wage and salary workers. The definitions of these categories are:

Tribal or Indian-Owned Business—tribal or Indian-owned business employees are persons employed in a business owned by a tribe or an American Indian, other than the respondent or the respondent's family.

Private Company, Business or Individual—private company, business, or individual workers are persons employed by a private company, business, or individual, for wages, salary, or commissions.

Tribal Government Workers—tribal government workers are persons employed by a tribal government, such as a tribal administrator or a teacher in a tribal school.

Federal Government Workers—Federal government workers are employees of any Federal governmental unit, regardless of the activity of the particular agency. This includes persons who work for the Bureau of Indian Affairs (BIA) and Indian Health Service (IHS).

State or Local Government Workers—State or local government workers are employees in public schools, government-owned bus lines, government-owned electric power utilities, and so forth. Persons elected to paid offices at the State or local level are also included.

Self-employed Workers—self-employed workers are those who work for profit or fees in their own unincorporated business, profession, or trade or who operate a farm.

Unpaid Family Workers—unpaid family workers are those who work without pay on a farm or in a business operated by a relative. Room and board and a cash allowance are not counted as pay for these family workers.

Types of Benefits Received in 1979

The data on benefits received in 1979 were derived from answers to question 28. The definitions of the categories shown in this report are as follows:

Medicare or Medicaid—the Medicare program is a Federal health insurance plan designed to provide adequate medical care for the aged and disabled. The plan also covers many persons under 65 years old who receive Social Security or Railroad Retirement benefits based on long-term disability.

The Medicaid program furnishes medical assistance for needy families with dependent children, and to aged, blind, or permanently and totally disabled individuals with resources insufficient to meet the cost of necessary medical services. The program is administered by State agencies and is funded through a combination of Federal, State, and local funds. Eligibility rules for this program vary from state to state.

Food Stamps—this Federally funded program increases food purchasing power by providing eligible households with coupons which can be used to purchase food. The U.S. Department of Agriculture administers the Food Stamp Program through State, local, and tribal governments. Free food commodities given by State, local, or tribal governments are not counted as food stamps.

Federal Housing Assistance—several programs are administered by the Department of Housing and Urban Development which provide housing assistance to low income families and indi-

viduals living in publicly or privately owned dwellings. Participation in public housing is determined by program eligibility and the availability of housing. Income standards for occupancy vary by local housing authority. Other programs involve the use of Federal, State, and local funds to subsidize low income tenants in privately owned housing through rent supplements paid to the property owner by a government agency or mortgage interest reduction savings to the owner.

Women, Infants, and Children (WIC)—benefits are received in the form of vouchers that are redeemed at retail stores for specific supplemental nutrition foods. Eligible low income recipients are infants and children up to age five, and pregnant, postpartum, and breastfeeding women.

Social Security (green colored check)—the program includes Social Security pensions and survivors benefits, and permanent disability payments made by the Social Security Administration. Medicare reimbursements are not included.

Supplemental Security-U.S. Government (gold colored check)—the program includes payment made by Federal, State, and local welfare agencies to low income persons who are (1) aged (65 years old and over), (2) blind, or (3) disabled.

Aid to Families With Dependent Children (AFDC)—money is provided from the State or local welfare offices under the Aid to Families With Dependent Children Program.

Bureau of Indian Affairs General Assistance—payments are provided for assistance from the Bureau of Indian Affairs.

Other Assistance or Welfare Payments—money received from other assistance programs such as general assistance, emergency assistance, tribal assistance or other Amerian Indian assistance, as well as free food commodities given by State, local, or tribal governments.

Total Income in 1979

The data on income in 1979 were derived from answers to question 29. Information on income received in the calendar year 1979 was requested from persons 15 years old and over. Persons were asked to report any income from the following (before deductions for taxes, bonds, dues, or other items): wages and salaries; own farm or non-farm business, partnership or professional practice (net after expenses); interest, dividends, or net rental income; Social Security or Railroad Retirement; public assistance or welfare; Unemployment Compensation; veterans' payments; pensions; alimony or child support; or any other money income received regularly. Instructions were to exclude lump-sum amounts such as gains from sale of property.

Although the income statistics cover the calendar year 1979, the characteristics of persons and the composition of families and households refer to the time of enumeration (April 1980). For example, the income of the family does not include amounts received by persons who were members of the family during all or part of the calendar year in 1979 if these persons no longer resided with the family at the time of enumeration. On the other hand, family income amounts reported by related persons who did not reside with the family during 1979 but who were members of the family at the time of enumeration are included. However, the composition of most families and households was the same during 1979 as in April 1980.

The income information in this report may differ from similar data shown in regular 1980 census reports because the data are derived from a single question on income rather than the addition of component types of income entries asked on the regular census questionnaires.

Median Income—The median income is the amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median.

Appendix B.—Definitions and Explanations of Subject Characteristics

or households, families, and unrelated individuals the median income is based on the distribution of the total number of units including those with no income. The median for persons is based on persons with income. The median income values for all households, families, and unrelated individuals are computed on the basis of more detailed income intervals than shown in this report. Median income figures are calculated using linear interpolation. For detailed description of these interpolation procedures, see appendix B of the Current Population Reports, Series -60, No. 129, *Money Income of Families and Persons in the United States: 1979*.

Mean Income—The mean income is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe. Thus, mean household income is obtained by dividing total household income by the total number of households. For the various types of income the means are based on households having those types of income.

Care should be exercised in using and interpreting mean income values for small subgroups of the population. Since the mean is strongly influenced by extreme values in the distribution, it is especially susceptible to the effects of sampling variability, misreporting, and processing errors. The median, which is not affected by extreme values, is, therefore, a better measure than the mean when the population base is small.

Poverty Status in 1979

Families and unrelated individuals are classified as being below or above the poverty level based on income in 1979 using a poverty index which provides a range of income cutoffs or "poverty thresholds" varying by size of family, number of children, and age of the family householder or unrelated individual. The poverty thresholds used in the 1980 census differ slightly from those used in the 1970 census, which took into account the same three factors as well

as sex of the family householder or unrelated individual and farm-nonfarm residence. In addition, for the 1980 census the thresholds by size of family were extended from 7 or more persons to 9 or more persons. The income cutoffs are updated each year to reflect the change in the Consumer Price Index. The poverty threshold for a family of four was \$7,412 in 1979; thresholds by size of family are shown below.

Weighted Average Poverty Thresholds: 1979

Size of family	Threshold
1 person:	
Under 65 years	\$3,774
65 years and over	3,479
2 persons:	
Householder under 65 years ..	4,876
Householder 65 years and over	4,389
3 persons	5,787
4 persons	7,412
5 persons	8,776
6 persons	9,915
7 persons	11,237
8 persons	12,484
9 or more persons	14,812

Households are classified below the poverty level when the total 1979 income of the family or of the nonfamily householder is below the appropriate poverty threshold. The income of persons living in the household who are unrelated to the householder is not considered when determining the poverty status of a household.

The poverty data in this report may differ from similar data shown in regular 1980 census reports because the income data are derived from a single question on total income rather than from the addition of types of income components.

Persons for Whom Poverty Status is Determined—Poverty status in this report is determined for all persons except unrelated individuals under 15 years old. For a detailed explanation of the poverty definition, see appendix B in *General Social and Economic Characteristics* reports, PC80-1-C.

Specified Poverty Level—Because the poverty definition currently in use by the Federal Government does not meet all the needs of the analysts of the data,

some of the data are presented for alternate definitions ranging from 75 percent to 200 percent of the current poverty level. These specified poverty levels are obtained by multiplying the income cutoffs at the poverty level by the appropriate factor. For example, the income cutoff at 125 percent of the poverty level was \$9,265 in 1979 for a family of 4 persons.

HOUSING CHARACTERISTICS

Living Quarters

Living quarters are classified in the census as either housing units or group quarters. (Group quarters were not enumerated in the Supplementary Questionnaire Program.) Usually, living quarters are in structures intended for residential use (e.g., a one-family home, apartment house, hotel or motel, boarding house, mobile home or trailer). However, living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a warehouse where a night guard lives) as well as in boats, tents, vans, etc.

Housing Units

A housing unit is a house, an apartment, a group of rooms, or a single room, occupied as a separate living quarters or, if vacant, intended for occupancy as a separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except those in Group Quarters as described in the next paragraph).

Group Quarters

Group quarters are any living quarters which are not classified as housing units.

There are two types of group quarters: (1) institutional group quarters, and (2) noninstitutional group quarters. Institutional group quarters are living quarters occupied by one or more persons under care or custody, such as children in an orphanage, persons in a nursing home, prisoners in a penitentiary. Noninstitutional group quarters include living quarters such as college-owned and/or operated dormitories, fraternity and sorority houses, nurses' dormitories, and boarding houses. In addition, non-institutional group quarters include any living quarters (other than those classified as institutional group quarters) which are occupied by 9 or more persons unrelated to the householder, or by 10 or more unrelated persons. Information on the housing characteristics of group quarters was not collected in the census.

TRANSCRIPTION ITEMS (REGULAR CENSUS QUESTIONNAIRES)

Responses to the questions on units at address, plumbing facilities, rooms, tenure, value, and contract rent, from the 1980 census short-form questionnaire were transcribed to the corresponding supplementary questionnaire. The items provide basic housing information and were transcribed to the supplementary questionnaire so these questions would not be asked twice.

Units at Address

Data on the number of housing units at an address are derived from answers to question H4. The statistics are presented for 1 unit, 2 to 9 units, and 10 or more units at an address. Data are also presented for mobile homes or trailers. In several census reports, data are provided on the number of housing units in structures of specified size. Care should be taken in using "Units at address" as a proxy for "Units in structure" because some multi-unit buildings have more than one street address.

Plumbing Facilities

Data on the plumbing facilities were derived from answers to question H6. The category "Complete plumbing for exclusive use" consists of units which have hot and cold piped water, a flush toilet, and a bathtub or shower inside the housing unit for the exclusive use of the occupants of the unit. "Lacking complete plumbing for exclusive use" includes those conditions when (1) all three specified plumbing facilities are present inside the unit, but are also used by another household; (2) some but not all the facilities are present; or (3) none of the three specified plumbing facilities is present.

Rooms

Data on rooms were derived from answers to question H7. The statistics on "Rooms" are in the terms of the number of housing units with a specified number of rooms. The intent of this question is to count the number of whole rooms used for living purposes. For each unit they include living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, enclosed porches suitable for year-round use, and lodger's rooms. Excluded are strip or pullman kitchens, bathrooms, open porches, balconies, halls, half-rooms, utility rooms, unfinished attics or basements, or other unfinished space used for storage. A partially divided room is a separate room only if there is a partition from floor to ceiling.

Medians for rooms are rounded to the nearest tenth. In computing medians for rooms, the whole number is used as the midpoint of the interval so that, for example, the category "3 rooms" is treated as an interval ranging from 2.5 to 3.5 rooms.

Tenure

Data on tenure were derived from answers to question H8. A housing unit is "Owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. All other

occupied units are classified as "Renter occupied," including units rented for cash rent and those occupied without payment of cash rent.

Value

Data on value were derived from answers to question H11. Value is the respondent's estimate of how much the property (house and lot) or condominium unit would sell for, if it were for sale. Value and price asked are tabulated separately for certain kinds of housing units. Value statistics are presented for "Specified owner-occupied" housing units. These "specified" housing units include only one-family houses on less than 10 acres without a commercial establishment or medical office on the property. Mobile homes, trailers, boats, tents, or vans occupied as a usual residence, and owner-occupied noncondominium units in multi-family buildings are also excluded from the value tabulations.

Contract Rent

Data on contract rent were derived from answers to question H12. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. For vacant units, it is the rent asked for the unit at the time of enumeration. The statistics on rent are tabulated for "Specified renter-occupied" housing units which include renter units except one-family houses on 10 or more acres. Respondents were asked to report rent only for the housing unit enumerated and to exclude any rent paid for additional units for business premises. Renter units occupied without payment of cash rent are shown separately as "No cash rent" in the rent tabulations.

SUPPLEMENTARY QUESTIONNAIRE ITEMS

Occupancy and Utilization Characteristics

Occupied Housing Units

A housing unit is classified as occupied if it is the usual place of residence of the person or group of persons living in it at the time of enumeration, or if the occupants are only temporarily absent; e.g., away on vacation. If all the persons staying in the unit at the time of the census have their usual place of residence elsewhere, the unit is classified as vacant. A household includes all the persons who occupy a housing unit as their usual place of residence. By definition, therefore, the number of occupied housing units is the same as the number of households. In tabulations presenting data from a sample of the housing units, there may be small differences in the counts resulting from processing procedures used to inflate the population and housing sample data.

Persons in Unit

All persons occupying the housing unit are included. These persons include not only occupants related to the householder but also any lodgers, roomers, boarders, partners, roommates, wards, foster children, and resident employees who share the living quarters of the householder. The data on "Persons in unit" show the number of housing units occupied by the specified number of persons.

Medians for persons are rounded to the nearest hundredth. In computing medians for persons per housing unit, the whole number is used as the midpoint of the interval so that, for example, the category "3 persons" is treated as an interval ranging from 2.50 up to 3.50 persons.

Persons Per Room

"Persons per room" is a derived measure obtained by dividing the number of persons in each occupied housing unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of occupied housing units having the specified ratio of persons per room.

Plumbing and Structural Characteristics

Piped Water

Data on piped water were derived from answers to questions 1a and 1b. A unit is classified as having piped water if water is piped to the unit from a pressure or gravity system. The supply of water may be available at a sink, wash basin, bathtub, or shower. Piped water must be located in the same building as the living quarters being enumerated to be counted as available for the units. Piped water may be located within the unit itself, or it may be in the hallway, or in a room used by several units in the building. It may be necessary to go outdoors to reach that part of the building in which the piped water is located. Units where there is no piped water in the living quarters even though there is piped water elsewhere on the property or elsewhere in the structure are classified as having no piped water.

Source of Water

Data on source of water were derived from answers to question 1c. Housing units may receive their water supply from a number of sources. The definitions of the types of source of water shown in this report are as follows:

Public system, private company, tribal or community system—A common source of water that supplies water to six or more housing units. The water may be supplied by a city, county, water district, water company, tribal system, community system, etc., or it may be obtained from a well which supplies piped water to six or more housing units.

Individual drilled well or individual dugged well—The water is supplied from a well on the property or on a neighboring property serving five or fewer housing units.

Private cistern—Refers to vessels in which rainwater is collected usually as it drains from the roof or, if the prop-

erty slopes, from a paved area. This source usually serves only one structure.

Creek, spring, river, lake, or pond—Water was obtained privately from a creek, spring, river, lake, or pond.

Other source—Water sources other than the ones listed above.

Sewage Disposal

Data on sewage disposal were derived from answers to question 2. The definitions of the types of sewage disposal shown in this report are as follows:

Public sewer—this applies to housing units connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. A public sewer may be operated by a government body, including a tribe, or by a private organization. Small sewage treatment plants, which in some localities are called neighborhood septic tanks, are also classified as public sewers.

Septic tank or cesspool—a housing unit is considered to be connected to a septic tank or cesspool when the unit is provided with an underground pit or tank for sewage disposal.

Chemical toilet or an outhouse or privy—a housing unit used a chemical toilet or an outhouse or privy for sewage disposal.

Other means—this includes all other means of sewage disposal than the ones listed above.

Year Structure Built

Data on year structure built were derived from answers to question 4. Year structure built refers to when the building was first constructed, not when it was remodeled, added to, or converted. For a houseboat or mobile home or trailer, the manufacturer's model year is assumed to be the year built. The figures shown in this report relate to the number of units in structures built during the specified periods and in existence at the time of enumeration.

Floor Materials

Data on floor materials were derived from answers to question 8. This item refers to the flooring materials, not to rugs, carpets or other floor covering. The classification identifies the main type of material used for the major portion of the floor area of the living quarters. The categories for types of material used are: (1) "Wood," including woodboards, plywoods, etc.; (2) "Asphalt, linoleum, or vinyl tiles;" (3) "Stone, concrete, brick, clay, or ceramic tile;" (4) "Metal," including zinc, steel, tin, etc.; (5) "Earth, gravel, sand;" and (6) "Other," for all types of materials which cannot be described by any of the other specific categories.

Exterior Wall Materials

Data on exterior wall materials were derived from answers to question 9. Units were classified according to the main type of material used in the construction for the major portion of the outside walls of the structure. The categories for types of material used are: (1) "Siding or shingles (wood or aluminum)," including asphalt shingles or vinyl siding and shingles; (2) "Brick, concrete block, stone, or stucco;" (3) "Logs;" (4) "Asphalt siding or tar paper;" (5) "Cloth or tent;" (6) "Mud, adobe, or sod;" (7) "Metal," including zinc, steel, tin, etc.; and (8) "Other," for materials not specified in the listed categories.

Equipment

Kitchen Facilities

Data on kitchen facilities were derived from answers to question 5a. A unit has complete kitchen facilities when it has all of the following: (1) an installed sink with piped water, (2) a range or cookstove, and (3) a mechanical refrigerator. All kitchen facilities must be located in the structure. They need not be in the same room. Quarters with only portable cooking equipment are not considered as having a range or cook-

stove. An icebox is not considered to be a mechanical refrigerator.

Refrigerator

Data on the presence of a refrigerator were derived from answers to question 5b. A unit is classified as having a refrigerator if there is a mechanical refrigerator available for the living quarters. Mechanical refrigerators make their own ice and may be operated by electricity, gas, or kerosene, or other source of power. An icebox is not considered to be a mechanical refrigerator.

Heating Equipment

Data on heating equipment were derived from answers to question 3. Housing units use specific types of heating equipment as their primary source of heat. The categories for types used are: (1) a steam or hot water system; (2) a central warm-air furnace with ducts to the individual rooms; (3) an electric heat pump; (4) other built-in electric units which are permanently installed in the floors, walls, ceilings, or baseboards, and are a part of the electrical installation of the building; (5) a floor, wall, or pipeless furnace; (6) room heaters with flue or vent that burn gas, oil, or kerosene; (7) nonportable room heaters without flue or vent that burn gas, oil, or kerosene; and (8) fireplaces, stoves, or portable room heaters of any kind that can be picked up and moved.

Electric Lighting

Data on electric lighting were derived from answers to questions 7a and 7b. Housing units are classified as having electric lighting if the unit has electric lighting fixtures or electric lamps in the unit or if the unit is equipped for electric lighting even though the current may be shut off or the service temporarily discontinued. If the electricity is supplied by a government body or a private organization, the units are classified as receiving electricity from a "Public or private utility company." Electricity may also be supplied by the following

sources: (1) rural electric cooperative; (2) Bureau of Indian Affairs electric system; (3) tribal system; and (4) a generator, which may be operated by means of diesel oil, solar or other sources of energy. Sources of electric lighting other than the ones listed were included in the category "Other."

Telephone in Housing Unit

Data on telephone in the housing unit were derived from answers to questions 6a and 6b. A unit is classified as having a telephone if there is a telephone in the living quarters. Units where the respondent uses a telephone located inside the building but not in the respondent's living quarters are classified as having no telephone.

Appendix C.—General Enumeration and Processing Procedures

USUAL PLACE OF RESIDENCE	C-1
DATA COLLECTION PROCEDURES	C-2

USUAL PLACE OF RESIDENCE

In accordance with census practice dating back to the first U.S. Census in 1790, each person enumerated in the 1980 census was counted as an inhabitant of his or her "usual place of residence," which is generally construed to mean the place where the person lives and sleeps most of the time. This place is not necessarily the same as the person's legal residence or voting residence. In the vast majority of cases, however, the uses of these different bases of classification would produce substantially the same statistics, although there might be appreciable differences for a few areas.

The implementation of this practice has resulted in the establishment of residence rules for certain categories of persons whose usual place of residence is not immediately apparent. Furthermore, this practice means that persons were not always counted as residents of the place where they happened to be staying on Census Day (April 1). Persons without a usual place of residence, however, were counted where they happened to be staying.

Armed Forces—Members of the Armed Forces living on a military installation were counted, as in every previous census, as residents of the area in which the installation was located; members of the Armed Forces not living on a military installation were counted as residents of the area in which they were living. Family members of Armed Forces

personnel were counted where they were living on Census Day (i.e., with the Armed Forces personnel or at another location, as the case might be).

Each Navy ship was attributed to the municipality that the Department of the Navy designated as its homeport, except for those ships which were deployed to the 6th or 7th Fleet on Census Day. As was done in the 1970 census, naval personnel aboard deployed ships were defined in the 1980 census as part of the overseas population, because deployment to the 6th or 7th Fleet implies a long-term overseas assignment.

In homeports with fewer than 1,000 naval personnel assigned to ships, the crews were counted aboard the ship. In homeports with 1,000 or more naval personnel assigned to ships, the naval personnel who indicated that they had a usual residence within 50 miles of the homeport of their ship were attributed to that residence.

When a homeport designated by the Navy was contained in more than one municipality, ships homeported and berthed there on Census Day were assigned by the Bureau of the Census to the municipality in which the land immediately adjacent to the dock or pier was actually located. Other ships attributed by the Navy to that homeport, but which were not physically present and not deployed to the 6th or 7th Fleet on Census Day, were allocated to the municipality named on the Navy's homeport list.

Crew of Merchant Vessels—Shipboard Census Reports were mailed to crews of merchant vessels through the ships' respective owner-operators based on lists of U.S. flag merchant vessels obtained from the Maritime

Administration, U.S. Department of Commerce.

If the ship was berthed in a U.S. port on Census Day, the crew was enumerated as of that port. If the ship was not berthed in a U.S. port but was inside the territorial waters of the United States, the crew was enumerated as of (a) the port of destination if that port was inside the United States or (b) the homeport of the ship if its port of destination was outside the United States. Crews of U.S. flag vessels which were outside U.S. territorial waters on Census Day and crews of vessels flying a foreign flag were not enumerated in the 1980 census.

Persons Away at School—College students were counted as residents of the area in which they were living while attending college, as they have been since 1950. However, children in boarding schools below the college level were counted at their parental home, including children attending Bureau of Indian Affairs boarding schools.

Persons in Institutions—Inmates of institutions, who ordinarily live there for considerable periods of time, were counted as residents of the area where the institution was located. Patients in short-term wards (general, maternity, etc.) of hospitals were counted at their usual place of residence; if they had no usual place of residence, they were counted at the hospital.

Persons Away From Their Residence on Census Day—Persons in hotels, motels, etc., on the night of March 31, 1980, were requested to fill out a census form for assignment of their census information back to their homes if they indicated that no one was at home.

to report them in the census. A similar approach was used for persons visiting in private residences, as well as for Americans who left the United States during March 1980 via major intercontinental air or ship carriers for temporary travel abroad. In addition, information on persons away from their usual place of residence was obtained from other members of their families, resident managers, neighbors, etc. If an entire household was expected to be away during the whole period of the enumeration, information on that household was obtained from neighbors. A matching process was used to eliminate duplicate reports for persons who reported for themselves while away from their usual residence and who were also reported at this usual residence by someone else.

A special enumeration was conducted in such facilities as missions, flophouses, jails, detention centers, etc., on the night of April 6, 1980, and persons enumerated therein were counted as residents of the area in which the establishment was located.

Americans Abroad—Americans who were overseas for an extended period (in the Armed Forces, working at civilian jobs, studying in foreign universities, etc.) were not included in the population of any State or the District of Columbia. On the other hand, Americans who were temporarily abroad on vacations, business trips, and the like were counted at their usual residence in the United States.

Citizens of Foreign Countries—Citizens of foreign countries having their usual residence (legally or illegally) in the United States on Census Day, including those working here (but not living at an embassy, ministry, legation, chancery, or consulate) and those attending school (but not living at an embassy, etc.), were included in the enumeration, as were members of their families living with them. However, citizens of foreign countries temporarily visiting or traveling in the United States or living on the premises of an embassy, etc.,

were not enumerated in the 1980 census.

DATA COLLECTION PROCEDURES

Regular Census questionnaires—The 1980 census was conducted primarily through self-enumeration. A census questionnaire was delivered by postal carriers to every housing unit several days before Census Day, April 1, 1980. This questionnaire included explanatory information and was accompanied by an instruction guide. Spanish-language versions of the questionnaire and instruction guide were available on request. The questionnaire was also available in narrative translation in 32 languages.

In most areas of the United States, altogether containing about 95 percent of the population, the householder was requested to fill out and mail back the questionnaire on Census Day. Approximately 83 percent of these households returned their forms by mail. Households that did not mail back a form and vacant housing units were visited by enumerator. Households that returned a form with incomplete or inconsistent information that exceeded a specified tolerance were contacted by telephone or, if necessary, by a personal visit, to obtain the missing information.

In the remaining (mostly sparsely settled) area of the country, which contained about 5 percent of the population, the householder was requested to fill out the questionnaire and hold it until visited by an enumerator. Incomplete and unfilled forms were completed by interview during the enumerator's visit. Vacant units were enumerated by a personal visit and observation.

Each housing unit in the country received one of two versions of the census questionnaire: a short-form questionnaire containing a limited number of basic population and housing questions or a long-form questionnaire containing these basic questions as well as a number of additional questions. A sampling procedure was used to determine those units which were to receive

the long-form questionnaire. Two sampling rates were employed. For most of the country, one in every six housing units (about 17 percent) received the long form or sample questionnaire; in counties, incorporated places and minor civil divisions estimated to have fewer than 2,500 inhabitants, every other housing unit (50 percent) received the sample questionnaire to enhance the reliability of sample data in small areas.

Special questionnaires were used for the enumeration of persons in group quarters such as colleges and universities, hospitals, prisons, military installations, and ships. These forms contained the population questions but did not include any housing questions.

Supplementary Questionnaire for American Indians (Reservations and Historic Areas of Oklahoma)—The 1980 census data on the supplementary questionnaire were collected in a direct interview by an enumerator. The Supplementary Questionnaire for American Indians was administered in households that received the *short form* regular census questionnaire and had at least one American Indian, Eskimo, or Aleut household member (approximately an 80 percent sample). This questionnaire was used on Federal and State reservations and in the historic areas of Oklahoma (excluding urbanized areas).

On Federal and State reservations, an enumerator visited the household to collect the regular census questionnaires. The enumerator reviewed the *short form* questionnaires for persons who identified as American Indian, Eskimo, or Aleut in the race item. If the *short form* household had an American Indian, Eskimo, or Aleut member, the householder was asked the questions on the supplementary questionnaire for every person in the household, regardless of race.

In the historic areas of Oklahoma (excluding urbanized areas), the district offices during the check-in operations reviewed the mail returned *short form* questionnaires for American Indian, Eskimo, or Aleut household members. During follow-up operations, any house-

Appendix C.—General Enumeration and Processing Procedures

hold with one or more American Indians, Eskimos, or Aleuts was asked the questions on the supplementary questionnaire for every person in the household, regardless of race.

PROCESSING PROCEDURES

The 1980 census Supplementary Questionnaires for American Indians were

designed to be processed by a keying operation. For most items on the questionnaire, the information obtained by the enumerator was indicated by marking answers in predesignated boxes. The questionnaires were processed through manual coding operations, since some questions required the respondent to provide write-in entries that could not be keyed. Census Bureau coders

assigned alphabetical or numerical codes to write-in entries for keying. The information was keyed onto computer tape.

The tape containing the information from the questionnaires was processed on the Census Bureau's computers through a number of editing and tabulation steps. The computer tape did not include information on individual names and addresses.

EDITING OF UNACCEPTABLE DATA	D-6

INTRODUCTION

The data tabulated in this publication are based on the 1980 census sample that was enumerated on the 1980 Census Supplementary Questionnaire For American Indians (Reservations and Historic Areas of Oklahoma). These data are estimates of the actual figures that would have resulted from a complete count. Estimates can be expected to vary from the complete count result, because they are subject to two basic types of error—sampling and non-sampling. The sampling error in the data arises from the selection of persons and housing units to be included in the sample. The nonsampling error, which affects both sample and complete count data, is the result of all other errors that may occur during the collection and processing phases of the census. A more detailed discussion of both sampling and nonsampling error and a description of the estimation procedure are given in this appendix.

SAMPLE DESIGN

While every person and housing unit on the American Indian reservations and

historic areas of Oklahoma (excluding urbanized areas) were enumerated on a questionnaire that requested certain basic demographic information (e.g., age, race, relationship), a sample of American Indians, Eskimos, and Aleuts living on reservations and in the historic areas of Oklahoma (excluding urbanized areas) was enumerated on the supplementary questionnaire that requested additional relevant information on the American Indian, Eskimo, and Aleut populations. The basic sampling unit for the 1980 census supplementary questionnaire was the housing unit with one or more American Indians, Eskimos, or Aleuts. Five out of every six of these housing units were designated for sample. Approximately 75 percent of the American Indians, Eskimos, and Aleuts living on American Indian reservations and in the historic areas of Oklahoma (excluding urbanized areas) were included in the supplementary questionnaire sample. Table F provides the percent of persons and housing units in the supplementary questionnaire sample for American Indian reservations and counties in the historic areas of Oklahoma (excluding urbanized areas).

ERRORS IN THE DATA

Since the data in this publication are based on a sample, they may differ somewhat from complete count figures that would have been obtained if all housing units, persons within those housing units, and persons living in group quarters had been enumerated, using the same questionnaires, instructions, enumerators, etc. The deviation of a sample estimate from the average of

all possible samples is called the sampling error. The standard error of a survey estimate is a measure of the variation among the estimates from the possible samples and is thus a measure of the precision with which an estimate from a particular sample approximates the average result of all possible samples. The sample estimate and its estimated standard error permit the construction of interval estimates with prescribed confidence that the interval includes the average result of all possible samples. The method of calculating standard errors and confidence intervals for the data in this report is given below.

In addition to the variability which arises from the sampling procedures, both sample data and complete-count data are subject to nonsampling error. Nonsampling error may be introduced during each of the many extensive and complex operations used to collect and process census data. For example, operations such as editing, reviewing, or handling questionnaires may introduce error into the data. A more detailed discussion of the sources of nonsampling error is given in the section, "Control of Nonsampling Error" in this appendix.

Nonsampling error may affect the data in two ways. Errors that are introduced randomly will increase the variability of the data and should therefore be reflected in the standard error; errors that tend to be consistent in one direction will make both sample and complete-count data biased in that direction. For example, if respondents consistently tend to under report their income, then the resulting counts of households or families by income category will be below the actual figures. Such biases are not reflected in the standard error.

Calculation of Standard Errors

Totals and Percentages—Tables B through E in this appendix contain the information necessary to calculate the standard errors of sample estimates in this report. In order to perform this calculation, it is necessary to know the unadjusted standard error for the characteristic, given in table B or C, that would result under a simple random sample design (of persons, families, or housing units) and estimation technique, and the adjustment factor for the particular characteristic estimated, given in table E. Tables D-1 and D-2 show groupings of American Indian reservations and groupings of counties in the historic areas of Oklahoma (excluding urbanized areas) that must be used in conjunction with tables E-1 and E-2. Tables E-1 and E-2 provide factors for groupings of American Indian reservations and groupings of counties in the historic areas of Oklahoma (excluding urbanized areas) by which the unadjusted standard errors obtained in table B or C must be multiplied. The adjustment factors reflect the effects of the actual sample design and complex ratio estimation procedures used to produce the estimates for this report.

To calculate the approximate standard error of an estimate for a specified geographic level, follow the steps given below:

- a. Obtain the unadjusted standard error from table B or C (or from the formula given below the table) for the estimated total or percentage, respectively.
- b. Find the American Indian reservation or the county in the historic areas of Oklahoma (excluding urbanized areas) with which you are working in table D-1 or table D-2 and obtain its Group Number. If the Group Number is denoted “—,” the standard error is zero. Skip step c.
- c. Use table E-1 for American Indian reservations or table E-2 for historic areas of Oklahoma (excluding urbanized areas) to obtain the factor

for the type of data item (e.g., labor force, occupation) and Group Number with which you are working. Multiply the unadjusted standard error by this factor.

As is evident from the formula below tables B and C, the unadjusted standard errors of zero estimates or of very small estimated totals or percentages approach zero. This is also the case for very large percentages or estimated totals that are close to the size of the tabulation areas to which they correspond. These estimated totals and percentages are, nevertheless, still subject to sampling and nonsampling variability, and an estimated standard error of zero (or a very small standard error) is not appropriate.

For estimated percentages that are less than 2 or greater than 98, use the unadjusted standard error in table C that appears in the “2 or 98” row. For an estimated total that is less than 50 or within 50 of the total size of the tabulation area use an unadjusted standard error of 2.

An illustration of the use of the tables will be given in a later section of this appendix.

Differences—The standard errors estimated from these tables are not directly applicable to differences between two sample estimates. In order to estimate the standard error of a difference, the tables are to be used somewhat differently in the following three situations:

- a. For the difference between a sample estimate and a complete-count value, use the standard error of the sample estimate.
- b. For the difference between (or sum of) two sample estimates, the appropriate standard error is approximately the square root of the sum of the two individual standard errors squared; that is, for standard errors Se_x and Se_y of estimates x and y:

$$Se_{(x+y)} = Se_{(x-y)} \doteq \sqrt{(Se_x)^2 + (Se_y)^2}$$

This method, however, will underestimate (overestimate) the standard error if the two items in a sum are highly positively (negatively) correlated or if the two items in a difference are highly negatively (positively) correlated. This method may also be used for the difference between (or sum of) sample estimates from two censuses or between a census sample and another survey. The standard error for estimates not based on the 1980 census must be obtained from an appropriate source outside of this publication.

- c. For the difference between two estimates, one of which is a subclass of the other, use the tables directly where the calculated difference is the estimate of interest.

Means—The standard error of a mean depends upon the variability of the distribution on which the mean is based, the size of the sample, the sample design (e.g., the use of households as sampling units), and the estimation procedure used.

An approximation to the standard error of the mean may be obtained as follows: compute the variance of the distribution on which the mean is based; multiply this value by 0.2 and divide the product by the total count of units in the distribution; obtain the square root of this quotient and multiply the result by the adjustment factor from table E that is appropriate for the characteristic on which the mean is based.

Medians—For the standard error of a median of a characteristic, it is necessary to examine the distribution from which the median is derived, as the size of the base and the distribution itself affect the standard error. An approximate method is given here. As the first step, compute one-half of the number on which the median is based (refer to this result as $N/2$). Treat $N/2$ as if it were an ordinary estimate and obtain its standard error as instructed above using tables B, D, and E. Compute the desired confidence interval about $N/2$. Starting

with the lowest value of the characteristic, cumulate the frequencies in each category of the characteristic until the sum equals or first exceeds the lower limit of the confidence interval about $N/2$. By linear interpolation, obtain a value of the characteristic corresponding to this sum. This is the lower limit of the confidence interval of the median. In a similar manner, cumulate frequencies starting from the highest value of the characteristic until the sum equals or exceeds the count in excess of the upper limit of the interval about $N/2$. Interpolate as before to obtain the upper limit of the confidence interval for the estimated median.

Confidence Intervals

A sample estimate and its estimated standard error may be used to construct confidence intervals about the estimate. These intervals are ranges that will contain the average value of the estimated characteristic that results over all possible samples with a known probability. For example, if all possible samples that could result under the 1980 census Supplementary Questionnaire for American Indians sample design were independently selected and surveyed under the same conditions, and if the estimate and its estimated standard error were calculated for each of these samples, then:

- (1) Approximately 68 percent of the intervals from one estimated standard error below the estimate to one estimated standard error above the estimate would contain the average result from all possible samples, and
- (2) Approximately 95 percent of the intervals from two estimated standard errors below the estimate to two estimated standard errors above the estimate would contain the average result from all possible samples.

The intervals are referred to as 68 percent and 95 percent confidence intervals, respectively.

The average value of the estimated characteristic that could be derived from all possible samples is or is not contained in any particular computed interval. Thus, we cannot make the statement that the average value has a certain probability of falling between the limits of the calculated confidence interval. Rather, one can say with a specified probability or confidence that the calculated confidence interval includes the average estimate from all possible samples (approximately the complete-count value).

Confidence intervals may also be constructed for the difference between two sample figures. This is done by computing the difference between these figures, obtaining the standard error of the difference (using the formula given earlier) and then forming a confidence interval for this estimated difference as above. One can then say with specified confidence that this interval includes the difference that would have been obtained by averaging the results from all possible samples.

The estimated standard errors given in this report do not include all portions of the variability due to nonsampling error that may be present in the data. The standard errors reflect the effect of simple response variance, but not the effect of correlated errors introduced by enumerators, coders, or other field or processing personnel. Thus, the standard errors calculated represent a lower bound on the total error. As a result, confidence intervals formed using these estimated standard errors may not meet the stated levels of confidence (i.e., 68 or 95 percent). Thus, some care must be exercised in the interpretation of the data in this publication based on the estimated standard errors.

For more information on confidence intervals and nonsampling error, see any standard sampling theory text.

Use of Tables to Compute Standard Errors

For Blackfeet Reservation, out of all 1,130 males aged 25 years and over, 562 were high school graduates. The

procedure for obtaining the standard error of the estimate 562 will be demonstrated.

The unadjusted standard error for the estimated total is obtained from table B or from the formula below table B. In order to avoid interpolation, the use of the formula will be demonstrated here. By the formula, the unadjusted standard error, Se , is given by

$$Se = \sqrt{0.2(562)} \left(1 - \frac{562}{6,067}\right) = 10 \text{ persons}$$

Note: The total count of persons for the Blackfeet Reservation is 6,067.

The standard error of the estimated 562 males aged 25 years and over who were high school graduates is found by multiplying the unadjusted standard error, 10, by the appropriate adjustment factor. Table D—1 shows that the Blackfeet Reservation is in Group Number 3. Table E—1 shows that the adjustment factor for "Educational Attainment," Group Number 3, is 2.9. Thus, the estimated standard error is 10×2.9 or 29.

The estimated percent of males aged 25 years and over who were high school graduates is 49.7. From table C, (and linear interpolation), the unadjusted standard error is found to be 0.67 (with rounding). Thus, the standard error for the estimated percent of males aged 25 years and over who were high school graduates is $0.67 \times 2.9 = 1.9$.

A note of caution concerning numerical values is necessary. Standard errors of percentages derived in this manner are approximate. The use of calculators allows for expressing calculations to many decimal places, but to do so would indicate more precision in the data than is justifiable. Final results should contain no more than one decimal place when the estimated standard error is one percentage point (i.e., 1.0) or more.

Next, the formation of confidence intervals will be illustrated. In the above example, the standard error of 562 persons persons on the Blackfeet Reservation aged 25 years and over who were high school graduates was found to be 29 persons. Thus, a 95 percent confidence interval for

Appendix D.—Accuracy of the Data

this estimated total is found to be

$$[562 - 2(29)] \text{ to } [562 + 2(29)]$$

or

$$504 \text{ to } 620$$

Thus, one can say with about 95 percent probability that this interval includes the actual value that would have been obtained by averaging the results from all possible samples.

The calculation of standard errors and confidence intervals will be illustrated when a difference of two sample estimates is obtained. For example, the number of males aged 25 years and over on the Pine Ridge Reservation who were high school graduates is 942 and the total number of males aged 25 years and over is 2,124. Thus, the percentage of males aged 25 years and over who were high school graduates is 44.4 percent. The unadjusted standard error from table C is 0.48 percent. From table D-1 one finds that the Pine Ridge Reservation is in Group Number 3. Table E-1 shows that the adjustment factor for "Educational Attainment" for Group Number 3 is 2.9. Thus, the approximate standard error of the percentage (44.4 percent) is 0.48X2.9 or 1.4 percent.

Suppose that one wishes to obtain the standard error of the difference between the Blackfeet and Pine Ridge Reservations of the percentages of males who were aged 25 years and over and who were high school graduates.

The difference in the estimated percentages of interest for the two reservations is

$$49.7 - 44.4 = 5.3 \text{ percent}$$

Using the results of the previous example

$$\begin{aligned} Se(5.3) &= \sqrt{Se(49.7)^2 + Se(44.4)^2} \\ &= \sqrt{(1.9)^2 + (1.4)^2} \\ &= 2.4 \text{ percent} \end{aligned}$$

The 95 percent confidence interval for the difference is formed as before.

$$[5.3 - 2(2.4)] \text{ to } [5.3 + 2(2.4)]$$

or

$$.5 \text{ to } 10.1$$

Thus, one can say with 95 percent probability that this interval includes the

actual difference that would have been obtained by averaging the results from all possible samples.

Estimation Procedure

The estimates which appear in this publication were obtained from an iterative ratio estimation procedure which resulted in the assignment of a weight to each sample person or housing unit record. For any given tabulation area, a characteristic total was estimated by summing the weights assigned to the persons or housing units in the tabulation area which possessed the characteristic. Estimates of family characteristics were based only on the weights assigned to the family members designated as householders. Each sample person or housing unit record was assigned exactly one weight to be used to produce estimates of all characteristics. For example, if the weight given to a sample person or housing unit had the value two, all characteristics of that person or housing unit would be tabulated with a weight of two. The estimation procedure, however, will assign weights which vary from person to person or housing unit to housing unit.

The estimation procedure used to assign the weights was performed separately for persons and housing units, and was performed independently within each county within reservation (CWR).

Within a CWR, the ratio estimation procedure for persons was performed in three stages. For persons the first stage employed 16 household type groups. The second stage used two groups: householders and nonhouseholders. The third stage could potentially use 32 age-sex-race groups.

The stages were as follows:

Persons Stage I—Type of Household

Group	Persons in units with a family householder with own children under 18
1	2 persons in housing unit
2	3 persons in housing unit
3	4 persons in housing unit

4	5 to 7 persons in housing unit
5	8 or more persons in housing unit

Persons in units with a family householder without own children under 18

Group	2 persons in housing unit through 8 or more persons in housing unit
6-10	2 persons in housing unit through 8 or more persons in housing unit

Other Households

11	1 person in housing unit
12-16	2 persons in housing unit through 8 or more persons in housing unit

Stage II—Householder/ Nonhouseholder

Group	Householder
2	Nonhouseholder

Stage III—Age/Sex/Race

American Indian, Eskimo or Aleut Race

Group	Male
1	0 to 4 years of age
2	5 to 14 years of age
3	15 to 19 years of age
4	20 to 24 years of age
5	25 to 34 years of age
6	35 to 44 years of age
7	45 to 64 years of age
8	65 years of age or older

Female

9-16	Same age categories as groups 1 to 8
------	--------------------------------------

17-32	Other than American Indian, Eskimo or Aleut Race
-------	--

Same age-sex categories as group 1 to 16

Within a CWR, the first step in the estimation procedure was to assign each sample person record an initial weight. This weight was approximately equal to the inverse of the probability of selecting a person for the sample.

The next step in the estimation procedure was to combine, if necessary, the groups in each of the three stages

prior to the repeated ratio estimation in order to increase the reliability of the ratio estimation procedure. For the first, second, and third stages, any group that did not meet certain criteria concerning the unweighted sample count or the ratio of the complete count to the initially weighted sample count, was combined, or collapsed, with another group in the same stage according to a specified collapsing pattern.

As a final step, the initial weights underwent three stages of ratio adjustment which used the groups listed above. At the first stage, the ratio of the complete census count to the sum of the initial weights for each sample person was computed for each stage I group. The initial weight assigned to each person in a group was then multiplied by the stage I group ratio to produce an adjusted weight. In stage II, the stage I weights were again adjusted by the ratio of the complete census count to the sum of the stage I weights for sample persons in each stage II group. Finally, the stage II weights were adjusted at stage III by the ratio of the complete census count to the sum of the stage II weights for sample persons in each stage III group. The three stages of adjustment were performed twice (two iterations) in the order given above. The weights obtained from the second iteration for stage III were assigned to the sample person records.

The ratio estimation procedure for housing units was essentially the same as that for persons. The major difference was that the occupied housing unit ratio estimation procedure was done in two stages. The first stage for occupied housing units employed 16 household type groups and the second stage could potentially use 38 tenure, race, and value/rent groups. The stages for the ratio estimation for occupied housing units were as follows:

Occupied Housing Units

Stage I—Type of Household

Family With Own Children

<i>Group</i>	<i>Under 18</i>
1	2 persons in housing unit

2	3 persons in housing unit	28-38	<i>Other than American Indian, Eskimo, or Aleut Race (Householder)</i>
3	4 persons in housing unit		
4	5 to 7 persons in housing unit		
5	8 or more persons in housing unit		Same rent—American Indian, Eskimo, or Aleut Race groups as groups 17 to 27
	<i>Family Without Own Children Under 18</i>		
6-10	2 persons in housing unit through 8 or more persons in housing unit		
	<i>Non-Family</i>		
11	1 person in housing unit		
12-16	2 persons in housing unit through 8 or more persons in housing unit		
	<i>Stage II—Tenure/Race of Householder/Value or Rent</i>		
		<i>Owner</i>	
		<i>American Indian, Eskimo or Aleut Race (Householder)</i>	
		<i>Group</i>	<i>Value of house</i>
1	\$ 0 to \$ 9,999		
2	\$ 10,000 to \$ 19,999		
3	\$ 20,000 to \$ 34,999		
4	\$ 35,000 to \$ 49,999		
5	\$ 50,000 to \$ 99,999		
6	\$ 100,000 to \$ 149,999		
7	\$ 150,000 and over		
8	Other owners		
9-16	<i>Other than American Indian, Eskimo or Aleut Race (Householder)</i>		
	Same value—American Indian, Eskimo, or Aleut Race group as groups 1 to 8.		
		<i>Renter</i>	
		<i>American Indian, Eskimo or Aleut Race (Householder)</i>	
		<i>Rent categories</i>	
17	\$1 to \$59		
18	\$60 to \$99		
19	\$100 to \$149		
20	\$150 to \$199		
21	\$200 to \$249		
22	\$250 to \$299		
23	\$300 to \$399		
24	\$400 to \$499		
25	\$500		
26	Other renter		
27	No cash rent		

The estimates produced by this procedure realize some of the gains in sampling efficiency that would have resulted if the population had been stratified into the ratio estimation groups before sampling, and the sampling rate had been applied independently to each group. The net effect is a reduction in both the standard error and the possible bias of most estimated characteristics to levels below what would have resulted from simply using the initial (unadjusted) weight. A by-product of this estimation procedure is that the estimates from the sample will, for the most part, be consistent with the complete count figures for the population and housing unit groups used in the estimation procedure.

CONTROL OF NONSAMPLING ERROR

In any large-scale statistical operation such as a census, human and mechanical errors occur. These errors are commonly referred to as nonsampling errors. Such errors include failure to enumerate every housing unit or person in the population, not obtaining all required information from respondents, obtaining incorrect or inconsistent information, and recording information incorrectly. Errors can occur during the field review of the enumerators' work, the clerical handling of the census questionnaires, or the electronic processing of the questionnaires.

In an attempt to reduce various types of nonsampling error in the census, quality control and review procedures were used throughout the address list compilation, data collection, and processing phases to minimize undercoverage of the population and housing units and to keep other nonsampling errors at a minimum. Additional information can be found in appendix D of PC80-1-C,

General Social and Economic Characteristics.

EDITING OF UNACCEPTABLE DATA

The objective of the processing operation is to produce a set of statistics that describes the population and housing as accurately and clearly as possible.

If a characteristic for a person or housing unit was still missing when the questionnaires reached the processing office, it was supplied, in most cases, by allocation. Allocations, or assignments of acceptable entries in place of unacceptable entries, were needed most often

when there was no entry for a given item or the response was inconsistent with other information for the person or housing unit. As in previous censuses, the general procedure for changing unacceptable entries was to assign an entry that was consistent with entries for other persons or housing units with similar characteristics. The following characteristics for a person were not allocated: tribal affiliation and enrollment, type of school, place of residence 1 year ago, year moved onto reservation, health services, usual source of health care, travel time to health care facility, payment for health care, and location of industry.

A dash is shown in the tables of this report for the reservations listed below and indicates that the number of supplementary questionnaires collected for these reservations was insufficient to produce reliable estimates.

Agua Caliente Reservation, Calif.

Hopland Rancheria, Calif.

Kootenai Reservation, Idaho

Mille Lacs Reservation, Minn.

Onondaga Reservation, N.Y.

San Manuel Reservation, Calif.

Skull Valley Reservation, Utah

Torres-Martinez Reservation, Calif.

Tuscarora Reservation, N.Y.

Woodfords Community, Calif.

Other reservation lands in Montana

Table B. Unadjusted Standard Errors for Estimated Totals

[Based on a 5-in-6 Simple Random Sample]

Estimated 1/ Total	Size of publication area 2/								
	100	500	1,000	5,000	10,000	50,000	100,000	250,000	500,000
50.....	2	3	3	3	3	3	3	3	3
250.....	-	5	6	7	7	7	7	7	7
500.....	-	-	7	9	10	10	10	10	10
1,600.....	-	-	-	13	13	14	14	14	14
2,500.....	-	-	-	16	19	22	22	22	22
5,000.....	-	-	-	-	22	30	31	31	31
10,000.....	-	-	-	-	-	40	42	44	44
15,000.....	-	-	-	-	-	46	50	53	54
25,000.....	-	-	-	-	-	50	61	67	69
50,000.....	-	-	-	-	-	-	71	89	95
75,000.....	-	-	-	-	-	-	-	102	113
100,000.....	-	-	-	-	-	-	-	110	126
250,000.....	-	-	-	-	-	-	-	-	158

1/ For estimated totals larger than 250,000 the standard error is somewhat larger than the table values. The formula given below should be used to calculate the standard error.

2/ The total count of persons in the area if the estimated total is a person characteristic, or the total count of housing units in the area if the estimated total is a housing unit characteristic.

$$Se(\hat{Y}) = \sqrt{0.2 \hat{Y} (1 - \frac{\hat{Y}}{N})}$$

N = Size of area

\hat{Y} = Estimate of characteristic total

Table C. Unadjusted Standard Errors for Estimated Percentages
 [In percentage points]

Estimated Percentage	Base of percentage 1/						
	50	100	250	500	1,000	2,500	10,000
2 or 98.....	0.9	0.6	0.4	0.3	0.2	0.1	0.1
5 or 95.....	1.4	1.0	0.6	0.4	0.3	0.2	0.1
10 or 90.....	1.9	1.3	0.8	0.6	0.4	0.3	0.1
15 or 85.....	2.3	1.6	1.0	0.7	0.5	0.3	0.2
20 or 80.....	2.5	1.8	1.1	0.8	0.6	0.4	0.2
25 or 75.....	2.7	1.9	1.2	0.9	0.6	0.4	0.2
30 or 60.....	2.9	2.0	1.3	0.9	0.6	0.4	0.2
35 or 65.....	3.0	2.1	1.3	1.0	0.7	0.4	0.2
50.....	3.2	2.2	1.4	1.0	0.7	0.4	0.2

1/ For a percentage and/or a base of percentage not shown in the table, the formula given below may be used to calculate the standard error.

$$Se(\hat{p}) = \sqrt{\frac{0.2}{B} \hat{p} (100-\hat{p})}$$

B = Base of estimate percentage

\hat{p} = Estimated percentage

Appendix D.—Accuracy of the Data

Table D-1. American Indian Reservations

GENERAL

The results of the 1980 Census of Population and Housing are issued in three forms: printed reports, computer tape

files, and microfiche. Most of the reports listed are issued on a flow basis through 1983. A few may be issued later, such as Subject Reports and Evaluation and Reference Reports.

The publications of the 1980 census are released under three subject titles: *1980 Census of Population and Housing*, *1980 Census of Population*, and *1980 Census of Housing*. The description of the publication program below is organized in sections, by census title, followed by the reports under each title. It should be noted that a number of population census reports contain some housing data and a number of housing census reports contain some population data. Following the description of the publication program are sections on computer tapes, maps, and microfiche.

The data product descriptions include listings of geographic areas for which data are summarized in that product. Note that the term "place" refers to incorporated places and census designated (or unincorporated) places, as well as towns and townships in 11 States (the 6 New England States, the 3 Middle Atlantic States, Michigan, and Wisconsin).

Order forms for these materials are available, subject to availability of the data product, from Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233; Census Bureau Regional Offices; U.S. Department of Commerce District Offices; and State Data Centers. After issuance, census reports are on file in many libraries and are available for examination at any Department of Commerce District Office or Census Bureau Regional Office.

PUBLICATIONS

Population and Housing Census Reports

PHC80-1, Block Statistics—These reports, which are issued on microfiche rather

Appendix F.—Publication and Computer Tape Program

than in print form, present population and housing unit totals and statistics on selected characteristics which are based on complete-count tabulations. Data are shown for blocks in urbanized areas and selected adjacent areas, for blocks in places of 10,000 or more inhabitants, and for blocks in areas which contracted with the Census Bureau to provide block statistics.

The set of reports consists of 374 sets of microfiche and includes a report for each standard metropolitan statistical area (SMSA), showing blocked areas within the SMSA, and a report for each State and for Puerto Rico, showing blocked areas outside SMSA's. In addition to microfiche, printed detailed maps showing the blocks covered by the particular report are available as well as a U.S. Summary, which is an index to the set.

PHC80-2, Census Tracts—Statistics for most of the population and housing subjects included in the 1980 census are presented for census tracts in SMSA's and in other tracted areas. Both complete-count data and sample data are included. Most statistics are presented by race and Spanish origin for areas with at least a specified number of persons in the relevant population group.

There is one report for each SMSA, as well as one for each of the States and Puerto Rico which have tracted areas outside SMSA's. In addition, maps showing the boundaries and identification numbers of census tracts in the SMSA are available as well as a U.S. Summary, which is an index to the set.

PHC80-3, Summary Characteristics for Governmental Units and Standard Metropolitan Statistical Areas—Statistics are presented on total population and on complete-count and sample population characteristics such as age, race, education, disability, ability to speak English, labor force, and income, and on total housing units and housing characteristics such as value, age of structure, and rent. These statistics are shown for the following areas or their equivalents: States, SMSA's, counties, county subdivisions (those which are functioning general-purpose local governments), and incorporated places.

There is one report for each State, the District of Columbia, and Puerto Rico.

This series does not include a U.S. Summary.

PHC80-4, Congressional Districts of the 98th Congress—These reports present complete-count and sample data for congressional districts of the 98th Congress. The reports reflect redistricting based on the 1982 elections. One report is issued for each of the 50 States and the District of Columbia.

PHC80-S1-1, Provisional Estimates of Social, Economic, and Housing Characteristics—This report presents provisional estimates based on sample data collected in the 1980 census. Data on social, economic, and housing characteristics are shown for the United States as a whole, each State, the District of Columbia, and SMSA's of 1 million or more inhabitants.

These data are based on a special subsample of the full census sample. The sample, which represents about 1.6 percent of the total population, was developed to provide users with initial data on characteristics of the population and housing units for the Nation and large areas.

PHC80-S2, Advance Estimates of Social, Economic, and Housing Characteristics—These reports present advance sample data from the 1980 census including such social and economic characteristics of the population as education, migration, labor force, and income as well as housing characteristics such as structural information, mortgage, and gross rent.

The set consists of 50 paperbound reports and includes one report for each State and the District of Columbia. No report will be issued for the United States as a whole.

Each report presents population and housing characteristics for the State, its counties or comparable areas, and places of 25,000 or more inhabitants. Selected data are shown for four race groups (White; Black; combined American Indian, Eskimo, and Aleut; and Asian and Pacific Islander) as well as for persons of Spanish origin.

Population Census Reports

PC80-1, Volume 1, Characteristics of the Population—This volume presents final

population counts and statistics on population characteristics. It consists of reports for the following 57 areas: the United States, each of the 50 States, the District of Columbia, Puerto Rico, and the Outlying Areas—Guam, the Virgin Islands of the United States, American Samoa, and the Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands. The volume consists of four chapters for each area, chapters A, B, C, and D. Chapters A and B present data collected on a complete-count basis, and chapters C and D present estimates based on sample information, except for the Outlying Areas where all data were collected on a complete-count basis.

The population totals presented in chapters A and B may differ from the counts presented earlier in the PHC80-V reports because corrections were made for errors found after the PHC80-V reports were issued. Chapters B, C, and D present statistics by race and Spanish origin for areas with at least a specified number of the relevant population group.

The U.S. Summary reports present statistics for the United States, regions, divisions, States, and selected areas below the State level. The State or equivalent Area reports (which include the District of Columbia, Puerto Rico, and the Outlying Areas) present statistics for the State or equivalent area and its subdivisions.

Statistics for each of the 57 areas are issued in separate paperbound reports of chapters A, B, C, and D.

PC80-1-A, Chapter A, Number of Inhabitants—Final population counts are shown for the following areas or their equivalents: States, counties, county subdivisions, incorporated places and census designated places, standard consolidated statistical areas (SCSA's), SMSA's, and urbanized areas. Selected tables contain population counts by urban and rural residence. Many tables contain population counts from previous censuses.

PC80-1-B, Chapter B, General Population Characteristics—Statistics on household relationship, age, race, Spanish origin, sex, and marital status are shown for the following areas or their equivalents: States, counties (by total and rural residence), county subdivisions, places of 1,000 or more inhabitants, SCSA's,

SMSA's, urbanized areas, American Indian reservations, and Alaska Native villages.

PC80-1-C, Chapter C, General Social and Economic Characteristics—Statistics are presented on nativity, State or country of birth, citizenship and year of immigration for the foreign-born population, language spoken at home and ability to speak English, ancestry, fertility, family composition, type of group quarters, marital history, residence in 1975, journey to work, school enrollment, years of school completed, disability, veteran status, labor force status, occupation, industry, class of worker, labor force status in 1979, income in 1979, and poverty status in 1979. In addition, data on subjects shown in the PC80-1-B reports are presented in this report in more detail.

Each subject is shown for some or all of the following areas or their equivalents: States, counties (by rural and rural-farm residence), places of 2,500 or more inhabitants, SCSA's, SMSA's, urbanized areas, American Indian reservations, and Alaska Native villages.

PC80-1-D, Chapter D, Detailed Population Characteristics—Statistics on most of the subjects covered in the PC80-1-C reports are presented in this report in considerably greater detail and cross-classified by age, race, Spanish origin, and other characteristics. Each subject is shown for the State or equivalent area, and some subjects are also shown for rural residence at the State level. Most subjects are shown for SMSA's of 250,000 or more inhabitants, and a few are shown for central cities of these SMSA's.

PC80-2, Volume 2, Subject Reports—Each of the reports in this volume focuses on a particular subject and provides highly detailed distributions and cross-classifications on a national, regional, and divisional level. A few reports show statistics for States, SMSA's, large cities, American Indian reservations, or Alaska Native villages. Separate reports are issued on such subjects as racial and ethnic groups, type of residence, fertility, families, marital status, migration, education, employment, occupation, industry, journey to work, income, poverty status, and other topics.

PC80-S1, Supplementary Reports—These reports present special compilations of

1980 census statistics dealing with specific population subjects.

Housing Census Reports

HC80-1, Volume 1, Characteristics of Housing Units—This volume presents final housing unit counts and statistics on housing characteristics. It consists of reports for the following 57 areas: the United States, each of the 50 States, the District of Columbia, Puerto Rico, and the Outlying Areas—Guam, the Virgin Islands of the United States, American Samoa, and the Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands. The volume consists of two chapters for each area, chapters A and B. Chapter A presents data collected on a complete-count basis, and chapter B presents estimates based on sample information, except for the Outlying Areas where all data were collected on a complete-count basis.

The housing totals presented in this report may differ from the counts presented earlier in the PHC80-V reports because corrections were made for errors found after the PHC80-V reports were issued. Both chapters present statistics by race and Spanish origin for areas with at least a specified number of the relevant population group.

The U.S. Summary reports present statistics for the United States, regions, divisions, States, and selected areas below the State level. The State or equivalent Area reports (which include the District of Columbia, Puerto Rico, and the Outlying Areas) present statistics for the State or equivalent area and its subdivisions.

Statistics for each of the 57 areas are issued in separate paperbound reports of chapters A and B.

HC80-1-A, Chapter A, General Housing Characteristics—Statistics on units at address, tenure, condominium status, number of rooms, persons per room, plumbing facilities, value, contract rent, and vacancy status are shown for some or all of the following areas or their equivalents: States, counties, county subdivisions, places of 1,000 or more inhabitants, SCSA's, SMSA's, urbanized areas, American Indian reservations, and Alaska Native villages. Selected tables contain housing characteristics by urban and rural residence.

HC80-1-B, Chapter B, Detailed Housing Characteristics—Statistics on units in structure, year moved into unit, year structure built, heating equipment, fuels, air-conditioning, source of water, sewage disposal, gross rent, and selected monthly ownership costs are shown for some or all of the following areas or their equivalents: States, counties, places of 2,500 or more inhabitants, SCSA's, SMSA's, urbanized areas, American Indian reservations, and Alaska Native villages. Selected tables show housing characteristics for rural and rural farm residence at the State and county level. Some subjects included in the HC80-1-A reports are also covered in this report in more detail.

HC80-2, Volume 2, Metropolitan Housing Characteristics—This volume presents statistics on most of the 1980 housing census subjects in considerable detail and cross-classification. Most statistics are presented by race and Spanish origin for areas with at least a specified number of the relevant population group. Data are shown for States or equivalent areas, SMSA's and their central cities, and other cities of 50,000 or more inhabitants.

There is one report for each SMSA and one report for each State and Puerto Rico. The set includes a U.S. Summary report showing these statistics for the United States and regions.

HC80-3, Volume 3, Subject Reports—Each of the reports in this volume focuses on a particular subject and provides highly detailed distributions and cross-classifications on a national, regional, and divisional level. Separate reports are issued on housing of the elderly, mobile homes, and American Indian households.

HC80-4, Volume 4, Components of Inventory Change—This volume consists of two reports presenting statistics on the 1980 characteristics of housing units which existed in 1973, as well as on newly constructed units, conversions, mergers, demolitions, and other additions and losses to the housing inventory between 1973 and 1980. These reports present data derived from a sample survey conducted in the fall of 1980. Data are presented for the United States and regions in report I. Report II has two parts: Part A presents data for that group of SMSA's (not individually identified)

Appendix F.—Publication and Computer Tape Program

with populations of 1 million or more at the time of the 1970 census, and part B presents data for that group of SMSA's (not individually identified) with populations of less than 1 million at the time of the 1970 census.

HC80-5, Volume 5, Residential Finance—This volume consists of one report presenting statistics on the financing of non-farm homeowner and rental and vacant properties, including characteristics of the mortgage, property, and owner. The statistics are based on a sample survey conducted in the spring of 1981. Data are presented for the United States and regions. Some data are presented by inside and outside SMSA's and by central cities.

HC80-S1-1, Supplementary Reports—These reports present statistics from the 1980 Census of Housing on general characteristics of housing units for the 50 States and the District of Columbia, counties, and independent cities.

Evaluation and Reference Reports

PHC80-E, Evaluation and Research Reports—These reports present the results of the extensive evaluation program conducted as an integral part of the 1980 census. This program relates to such matters as completeness of enumeration and quality of the data on characteristics.

PHC80-R, Reference Reports—These reports present information on the various administrative and methodological aspects of the 1980 census. The series includes:

PHC80-R1, Users' Guide—This report covers subject content, procedures, geography, statistical products, limitations of the data, sources of user assistance, notes on data use, a glossary of terms, and guides for locating data in reports and tape files. The guide is issued in looseleaf form and sold in parts (R1-A, B, etc.) as they are printed.

PHC80-R2, History—This report describes in detail all phases of the 1980 census, from the earliest planning through all stages to the dissemination of data and evaluation of results. It contains detailed discussion of 1980 census questions and their use in previous decennial censuses.

PHC80-R3, Alphabetical Index of Industries and Occupations—This report was developed primarily for use in classifying responses to the questions on the kind of business (industry) and kind of work (occupation) in which the respondent is engaged. The index lists approximately 20,000 industry and 29,000 occupation titles in alphabetical order.

PHC80-R4, Classified Index of Industries and Occupations—This report defines the industrial and occupational classification systems adopted for the 1980 Census of Population. It presents the individual titles that constitute each of the 231 industry and 503 occupation categories in the classification systems. The individual titles are the same as those shown in the Alphabetical Index. The 1980 occupation classification reflects the new U.S. Standard Occupational Classification (SOC). As in the past, the 1980 industry classification reflects the Standard Industrial Classification (SIC).

PHC80-R5, Geographic Identification Code Scheme—This report identifies the names and related geographic codes for each State, county, minor civil division, place, region, division, SCSA, SMSA, American Indian reservation, and Alaska Native village for which the Census Bureau tabulated data from the 1980 census.

COMPUTER TAPES

Summary Tape Files

In addition to the printed and microfiche reports, results of the 1980 census also are provided on computer tape in the form of summary tape files (STF's). These data products have been designed to provide statistics with greater subject and geographic detail than is feasible or desirable to provide in printed and microfiche reports. The STF data are made available at nominal cost. The data are subject to suppression of certain detail where necessary to protect confidentiality.

There are five STF's (listed below), and the amount of geographic and subject detail presented varies. STF's 1 and 2 contain complete-count data, and STF's 3, 4, and 5 contain sample data. Note that the term "cells" used below refers

to the number of subject statistics provided for each geographic area, and the number of cells is indicative of the detail of the subject content of the file.

Each of the STF's generally consists of two or more files which provide different degrees of geographic detail and, in some cases, race/Spanish origin cross-classification. For each of the files there is a separate tape or tapes for each State, the District of Columbia, and Puerto Rico. Selected files (STF 1 and STF 3) are also produced for Guam, the Virgin Islands of the United States, American Samoa, and the Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands. These tapes are issued on a State-by-State basis and are followed by a national summary tape for the particular file. More complete descriptions of the STF's than given in the summaries below can be found in the technical documentation of the specific file and in the PHC80-R1, *Users' Guide*.

STF 1—This STF provides 321 cells of complete-count population and housing data. Data are summarized for the United States, regions, divisions, States, SCSA's, SMSA's, urbanized areas, congressional districts, counties, county subdivisions, places, census tracts, enumeration districts in unblocked areas, and blocks and block groups in blocked areas. The data include those shown in the PHC80-1, PHC80-3 (complete-count), and PC80-1-A reports.

STF 2—This STF contains 2,292 cells of detailed complete-count population and housing data, of which 962 are repeated for each race and Spanish origin group present in the tabulation area. Data are summarized for the United States, regions, divisions, States, SCSA's, SMSA's, urbanized areas, counties, county subdivisions, places of 1,000 or more inhabitants, census tracts, American Indian reservations, and Alaska Native villages. The data include those shown in the PHC80-2 (complete-count), PC80-1-B, and HC80-1-A reports.

STF 3—This STF contains 1,126 cells of data on various population and housing subjects collected on a sample basis. The areas covered are the same as in STF 1, excluding blocks. The data include those shown in the PHC80-3 (sample) reports.

STF 4—This STF is the geographic counterpart of STF 2, but the number of cells of data is greater (approximately 8,400). STF 4 provides data covering virtually all of the population and housing subjects collected on a sample basis, as well as some of the complete-count subjects. Some of the statistics are repeated for race, Spanish origin, and ancestry groups. Data are summarized for areas similar to those shown in STF 2, except that data for places are limited to those with 2,500 or more inhabitants. The data include those shown in the PHC80-2 (sample), PC80-1-C, and HC80-1-B reports.

STF 5—This STF contains over 100,000 cells of data on various population and housing subjects collected on a sample basis and provides detailed tabulations and cross-classifications for States, SMSA's, counties, cities of 50,000 or more inhabitants and central cities. Most subjects are classified by race and Spanish origin. The data include those shown in the PC80-1-D and HC80-2 reports.

Other Computer Tape Files

P.L. 94-171, Population Counts—In accordance with Public Law (P.L.) 94-171, the Census Bureau provides population tabulations to all States for legislative reapportionment/redistricting. The file is issued on a State-by-State basis. It contains population counts classified by race and Spanish origin. The data are tabulated for the following levels of geography as applicable: States, counties, county subdivisions, incorporated places, census tracts, blocks and block groups in blocked areas, and enumeration districts in unblocked areas. For States participating in the voluntary program to define election precincts in conjunction with the Census Bureau, the data are also tabulated for election precincts.

Master Area Reference Files 1 and 2 (MARF)

MARF 1—This geographic reference file is an extract of STF 1 designed for those who require a master list of geographic codes and areas, along with basic census counts arranged hierarchically from the State down to the block group and enumeration district levels and is issued on a State-by-State basis. The file contains records for States, counties, county subdivisions, places, census tracts, enumeration districts in unblocked areas, and block groups in blocked areas. Each record shows the total population by five race groups, population of Spanish origin, number of housing units, number of households, number of families, and a few other items.

MARF 2—This file is the same as the MARF 1 with the latitude and longitude coordinates for a representative point (centroid) in each block group (BG) or enumeration district (ED) outside block numbered areas.

Geographic Base File/Dual Independent Map Encoding (GBF/DIME)—These files are computer representations of the Metropolitan Map Series, including address ranges and ZIP Codes, which generally cover the urbanized portions of SMSA's. GBF/DIME files are used to assign census geographic codes to addresses (geocoding). The files are available by SMSA.

Public-Use Microdata Samples—Public-use microdata samples are computerized files containing most population and housing characteristics as shown on a sample of individual census records. These files contain no names or addresses, and geographic identification is sufficiently broad to protect confidentiality.

There are three mutually exclusive samples, the A sample including 5 percent of all persons and housing units, and the

B and C samples each including 1 percent of all persons and housing units. States and most large SMSA's will be identifiable on one or more of the files. Microdata files allow the user to prepare customized tabulations.

Census/EEO Special File—This file provides sample census data with specified relevance to EEO and affirmative action uses. The file contains two tabulations, one with detailed occupational data and the other with years of school completed by age. The data in both tabulations are crossed by sex, race, and Spanish origin. These data are provided for all counties, for all SMSA's, and for places with a population of 50,000 or more.

MAPS

Maps necessary to define areas are generally published and included as part of the corresponding reports. Maps are published for Block Statistics (PHC80-1) and Census Tracts (PHC80-2), but must be purchased separately from the report. Maps necessary to define enumeration districts are available on a cost-of-reproduction basis.

MICROFICHE

Some of the computer tape products are available on microfiche. The STF microfiche are issued for each State or Area and for the United States. These include:

STF 1 Microfiche—Data from STF 1 are presented in tabular form for all the STF 1 geographic levels described previously, except blocks.

STF 3 Microfiche—Data from STF 3 are presented in tabular form for all the STF 3 geographic levels.

P.L. 94-171 Counts Microfiche—The data from the P.L. 94-171 computer file are presented in a listing format.
